## Message from the President

Dear Shareholders,

Our mission at Farm Credit is to ensure that you and others like you with roots in agriculture and rural communities have a consistent, reliable source of financing. As you review this report, I am confident that you will see that your Association is well-positioned to meet that mission in Northwest Florida.

It is my intent and that of our Board and staff to ensure that you receive special value by being part of the Farm Credit community. Maybe it's the check you receive representing your share of the cooperative's profits. Maybe you appreciate knowing that Farm Credit has your back on issues that matter to you, or how we work to educate others about the importance of agriculture and our rural communities. Or, could it be something as simple, yet essential, as knowing that your Farm Credit lender understands you and your rural way of life? Whatever it is that compels you to be a part of Farm Credit, let me say thank you.

I am pleased to provide these highlights from your Association's 2017 year-end financial performance:

- Credit quality is within national standards for acceptability at 96.97%
- Capitalization is exceedingly strong with a Permanent Capital Ratio of 28.26%
- Return on Assets of 2.83% and Return on Equity of 9.45 %
- Net Income of \$8.041 million

Keep your eye on your mailbox in April for not only one, but two checks from Farm Credit. Because of the Association's favorable performance, your Board has declared a \$3 million distribution from 2017 earnings, and an additional \$1 million "bonus" dividend. The bonus distribution is related to a change in accounting estimate for pension and other postretirement benefit plans, which you can read more about in the footnotes to this report. Additionally, your Board elected to retire the balance of 2001 allocated surplus and almost half of the 2002 allocated surplus totaling approximately \$2.2 million. A surplus check or account credit for each borrower with a patronage-based loan in 2001 or 2002 was issued in early March.

A few of our agricultural borrowers experienced financial difficulty in 2017. In most cases, the Association was able to work with these borrowers to come up with viable options to continue their operation and repay their loans. As stated before, the Association is well-capitalized and has an adequate allowance for probable loan losses. We are ready and eager to serve the credit needs of our agricultural and rural borrowers this coming year. In fact, we are working to grow!

A recent survey proved what we have long known, that when it comes to attracting new Farm Credit borrowers nothing compares to what you, our current borrowers, have to say. Would you be so kind as to refer your friends and family to Farm Credit? New borrowers keep your cooperative strong for future generations.

On behalf of Farm Credit of Northwest Florida's Board of Directors and staff, thank you for your business and loyalty. We love serving you and having you as a part of Farm Credit.

Sincerely,

Ricky K. Bitner

Chief Executive Officer

## Report of Management

The accompanying consolidated financial statements and related financial information appearing throughout this Annual Report have been prepared by management of Farm Credit of Northwest Florida, ACA (Association) in accordance with generally accepted accounting principles appropriate in the circumstances. Amounts which must be based on estimates represent the best estimates and judgments of management. Management is responsible for the integrity, objectivity, consistency, and fair presentation of the consolidated financial statements and financial information contained in this report.

Management maintains and depends upon an internal accounting control system designed to provide reasonable assurance that transactions are properly authorized and recorded, that the financial records are reliable as the basis for the preparation of all financial statements, and that the assets of the Association are safeguarded. The design and implementation of all systems of internal control are based on judgments required to evaluate the costs of controls in relation to the expected benefits and to determine the appropriate balance between these costs and benefits. The Association maintains an internal audit program to monitor compliance with the systems of internal accounting control. Audits of the accounting records, accounting systems and internal controls are performed and internal audit reports, including appropriate recommendations for improvement, are submitted to the Board of Directors.

The consolidated financial statements have been audited by independent auditors, whose report appears elsewhere in this Annual Report. The Association is also subject to examination by the Farm Credit Administration.

The consolidated financial statements, in the opinion of management, fairly present the financial condition of the Association. The undersigned certify that we have reviewed the 2017 Annual Report of Farm Credit of Northwest Florida, ACA, that the report has been prepared under the oversight of the Audit Committee of the Board of Directors and in accordance with all applicable statutory or regulatory requirements, and that the information contained herein is true, accurate, and complete to the best of our knowledge and belief.

Richard Terry

Chairman of the Board

Ricky K. Bitner

Chief Executive Officer

John P. Mottice

Chief Financial Officer

## Report on Internal Control Over Financial Reporting

The Association's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America and includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its Consolidated Financial Statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of December 31, 2017. In making the assessment, management used the framework in *Internal Control — Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association's management concluded that as of December 31, 2017, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Association determined that there were no material weaknesses in the internal control over financial reporting as of December 31, 2017.

# Management's Discussion & Analysis of Financial Condition & Results of Operations

(dollars in thousands, except as noted)

#### GENERAL OVERVIEW

The following commentary summarizes the financial condition and results of operations of Farm Credit of Northwest Florida, ACA, (Association) for the year ended December 31, 2017, with comparisons to the years ended December 31, 2016 and December 31, 2015. This information should be read in conjunction with the Consolidated Financial Statements, Notes to the Consolidated Financial Statements and other sections in this Annual Report. The accompanying Consolidated Financial Statements were prepared under the oversight of the Audit Committee of the Board of Directors. For a list of the Audit Committee members, refer to the "Report of the Audit Committee" reflected in this Annual Report. Information in any part of this Annual Report may be incorporated by reference in answer or partial answer to any other item of the Annual Report.

The Association is an institution of the Farm Credit System (System), which was created by Congress in 1916 and has served agricultural producers for 100 years. The System's mission is to maintain and improve the income and well-being of American farmers, ranchers, and producers or harvesters of aquatic products and farm-related businesses. The System is the largest agricultural lending organization in the United States. The System is regulated by the Farm Credit Administration (FCA), which is an independent safety and soundness regulator.

The Association is a cooperative which is owned by the members (also referred to throughout this Annual Report as stockholders or shareholders) served. The territory of the Association extends across a diverse agricultural region of Northwest Florida. Refer to Note 1, *Organization and Operations*, of the Notes to the Consolidated Financial Statements for counties in the Association's territory. The Association provides credit to farmers, ranchers, rural residents, and agribusinesses. Our success begins with our extensive agricultural experience and knowledge of the market.

The Association obtains funding from AgFirst Farm Credit Bank (AgFirst or the Bank). The Association is materially affected and shareholder investment in the Association may be materially affected by the financial condition and results of operations of the Bank. Copies of the Bank's Annual and Quarterly Reports are on the AgFirst website, www.agfirst.com, or may be obtained at no charge by calling 1-800-845-1745, extension 2764, or writing Matthew Miller, AgFirst Farm Credit Bank, P. O. Box 1499, Columbia, SC 29202.

Copies of the Association's Annual and Quarterly Reports are also available upon request free of charge on the Association's website, *www.farmcredit-fl.com*, or by calling 1-850-526-4910 or writing John Mottice, Chief Financial Officer, Farm Credit of Northwest Florida, P.O. Box 7000, Marianna, FL 32447.

The Association prepares an electronic version of the Annual Report, which is available on the website within 75 days after the end of the fiscal year, and distributes the Annual Report to shareholders within 90 days after the end of the fiscal year. The Association prepares an electronic version of the Quarterly Report, which is available on the website within 40 days after the end of each fiscal quarter, except that no report needs to be prepared for the fiscal quarter that coincides with the end of the fiscal year of the Association.

#### FORWARD LOOKING INFORMATION

This annual information statement contains forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Words such as "anticipates," "believes," "could," "estimates," "may," "should," "will," or other variations of these terms are intended to identify the forward-looking statements. These statements are based on assumptions and analyses made in light of experience and other historical trends, current conditions, and expected future developments. However, actual results and developments may differ materially from our expectations and predictions due to a number of risks and uncertainties, many of which are beyond our control. These risks and uncertainties include, but are not limited to:

- political, legal, regulatory and economic conditions and developments in the United States and abroad;
- economic fluctuations in the agricultural, rural utility, international, and farm-related business sectors;
- weather-related, disease, and other adverse climatic or biological conditions that periodically occur that impact agricultural productivity and income;
- changes in United States government support of the agricultural industry and the Farm Credit System, as a government-sponsored enterprise, as well as investor and rating agency reactions to events involving other government-sponsored enterprises and other financial institutions; and
- actions taken by the Federal Reserve System in implementing monetary policy.

#### AGRICULTURAL OUTLOOK

The following United States Department of Agriculture (USDA) analysis provides a general understanding of the U.S. agricultural economic outlook. However, this outlook does not take into account all aspects of the Association's business. References to USDA information in this section refer to the U.S. agricultural market data and are not limited to information/data in the AgFirst District.

The February 2018 USDA forecast estimates 2017 farmers' net cash income, which is a measure of the cash income after payment of business expenses, at \$96.9 billion, up \$2.9 billion from 2016 and down \$9.0 billion from its 10-year average of \$105.9 billion. The increase in net cash income in 2017 was primarily due to increases in livestock receipts of \$12.5 billion and cash farm-related income of \$1.8 billion, partially offset by a decrease in crop cash receipts of \$4.7 billion and an increase in cash expenses of \$5.1 billion.

The February 2018 USDA outlook for the farm economy, as a whole, forecasts 2018 farmers' net cash income to decrease to \$91.9 billion, a \$5.0 billion decrease from 2017, and \$14.0 billion below the 10-year average. The forecasted decrease in farmers' net cash income for 2018 is primarily due to an expected increase in cash expenses of \$3.0 billion and decrease in crop and livestock receipts of \$2.0 billion.

The following table sets forth the commodity prices per bushel for certain crops, by hundredweight for hogs, milk, and beef cattle, and by pound for broilers and turkeys from December 31, 2014 to December 31, 2017:

| Commodity   | 12/31/17 | 12/31/16 | 12/31/15 | 12/31/14 |
|-------------|----------|----------|----------|----------|
| Hogs        | \$48.60  | \$43.10  | \$42.80  | \$64.30  |
| Milk        | \$17.20  | \$18.90  | \$17.30  | \$20.40  |
| Broilers    | \$0.50   | \$0.48   | \$0.47   | \$0.58   |
| Turkeys     | \$0.53   | \$0.74   | \$0.89   | \$0.73   |
| Corn        | \$3.23   | \$3.32   | \$3.65   | \$3.79   |
| Soybeans    | \$9.30   | \$9.64   | \$8.76   | \$10.30  |
| Wheat       | \$4.51   | \$3.90   | \$4.75   | \$6.14   |
| Beef Cattle | \$118.00 | \$111.00 | \$122.00 | \$164.00 |

The USDA's income outlook varies depending on farm size and commodity specialties. The USDA classifies all farms into four primary categories: small family farms (gross cash farm income (GCFI) less than \$350 thousand), midsize family farms (GCFI between \$350 thousand and under \$1 million), largescale family farms (GCFI of \$1 million or more), and nonfamily farms (principal operator or individuals related to the operator do not own a majority of the business). Approximately 99 percent of U.S. farms are family farms and the remaining 1 percent are nonfamily farms. The family farms produce 90 percent of the value of agricultural output and the nonfamily farms produce the remaining 10 percent of agricultural output. The small family farms represent about 90 percent of all U.S. farms, hold 51 percent of farm land operated by farms and account for 23 percent of the value of production. Approximately 68 percent of production occurs on 9 percent of family farms classified as midsize or large-scale.

According to the USDA February 2018 forecast, farm sector equity (assets minus debt) is expected to rise 1.6 percent in 2018 to nearly \$2.7 trillion. Farm sector assets are expected to rise 1.6 percent to \$3.1 trillion in 2018, while farm sector debt is expected to rise 1.0 percent to \$388.6 billion. Farm real estate accounts for about 84 percent of farm sector assets and the 2018 forecast anticipates a 2.1 percent increase in real estate values, continuing its long-term upward trend since the late 1980s.

Two measures of the financial health of the agricultural sector used by the USDA are the farm sector's debt-to-asset and debt-to-equity ratios. These ratios are forecast to move slightly downward in 2018 to 12.6 percent and 14.4 percent from 12.7 percent and 14.5 percent in 2017. These ratios remain well

below the all-time highs of over 20 percent experienced during the 1980s.

As estimated by the USDA in February 2018, the System's market share of farm business debt (defined as debt incurred by those involved in on-farm agricultural production) increased slightly to 40.9 percent at December 31, 2016 (the latest available data), as compared with 40.6 percent at December 31, 2015

Production agriculture is a cyclical business that is heavily influenced by commodity prices and various other factors. In a prolonged period of less favorable economic conditions in agriculture, including extensive and extended drought conditions, and without sufficient government support programs, including USDA-sponsored crop insurance programs, the Association's financial performance and credit quality measures would likely be negatively impacted. Conditions in the general economy remain more volatile given the state of the global economy. Any negative impact from these less favorable conditions should be lessened by geographic and commodity diversification and the influence of off-farm income sources supporting agricultural-related debt. However, agricultural borrowers who are more reliant on off-farm income sources may be more adversely impacted by a weakened general economy.

#### CRITICAL ACCOUNTING POLICIES

The Consolidated Financial Statements are reported in conformity with accounting principles generally accepted in the United States of America. Our significant accounting policies are critical to the understanding of our results of operations and financial position because some accounting policies require us to make complex or subjective judgments and estimates that may affect the value of certain assets or liabilities. We consider these policies critical because management must make judgments about matters that are inherently uncertain. For a complete discussion of significant accounting policies, see Note 2, Summary of Significant Accounting Policies, of the Notes to the Consolidated Financial Statements. The following is a summary of certain critical policies.

• Allowance for loan losses — The allowance for loan losses is maintained at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through allowance reversals and loan charge-offs. The allowance for loan losses is determined based on a periodic evaluation of the loan portfolio by management in which numerous factors are considered, including economic and political conditions, loan portfolio composition, credit quality and prior loan loss experience.

Significant individual loans are evaluated based on the borrower's overall financial condition, resources, and payment record, the prospects for support from any financially responsible guarantor, and, if appropriate, the estimated net realizable value of any collateral. The allowance for loan losses encompasses various judgments, evaluations and appraisals with respect to the loans and underlying security that, by nature, contain elements of uncertainty and imprecision. Changes in the agricultural economy and borrower repayment capacity will cause

these various judgments, evaluations and appraisals to change over time. Accordingly, actual circumstances could vary from the Association's expectations and predictions of those circumstances.

Management considers the following factors in determining and supporting the levels of allowance for loan losses: the concentration of lending in agriculture, combined with uncertainties in farmland values, commodity prices, exports, government assistance programs, regional economic effects and weather-related influences. Changes in the factors considered by management in the evaluation of losses in the loan portfolios could result in a change in the allowance for loan losses and could have a direct impact on the provision for loan losses and the results of operations.

• Valuation methodologies — Management applies various valuation methodologies to assets and liabilities that often involve a significant degree of judgment, particularly when liquid markets do not exist for the particular items being valued. Quoted market prices are referred to when estimating fair values for certain assets for which an observable liquid market exists, such as most investment securities. Management utilizes significant estimates and assumptions to value items for which an observable liquid market does not exist. Examples of these items include impaired loans, other property owned, pension and other postretirement benefit obligations, and certain other financial instruments. These valuations require the use of various assumptions, including, among others, discount rates, rates of return on assets, repayment rates, cash flows, default rates, costs of servicing and liquidation values. The use of different assumptions could produce significantly different results, which could have material positive or negative effects on the Association's results of operations.

#### **ECONOMIC CONDITIONS**

#### Florida Economy

The University of Central Florida's Institute for Economic Competitiveness projects annual Florida Real Gross State Product expansion of 2.8 percent in 2017, 4.1 percent in 2018, 4.1 percent in 2019 and 3.1 percent for 2020. Average annual growth is expected to be 0.9 percentage points faster than U.S. Real GDP over the same period. The short-run forecast for economic expansion is largely based on the impact of Hurricane Irma that hit Florida in September 2017. Florida payroll job growth is robust and continues to outpace national job growth. Year-over-year payroll growth is projected to average 2.5 percent in 2017, 2.4 percent in 2018, 2.3 percent in 2019, and 1.7 percent in 2020. Average job growth is expected to be 0.9 percent faster than the national economy over the same period. Labor force growth in Florida is projected to average 2.2 percent annually for 2017-2020. The strong job market will continue to put more Floridians back into the labor market and attract out-of-state job

Additional key factors for the Florida economy include:

 Sectors expected to have the strongest average job growth during 2017-2020 are Construction, Professional & Business Services, Financial, Leisure

- & Hospitality, Education & Health Services, and Trade, Transportation & Utilities.
- Housing starts will accelerate going forward, but not fast enough to meet near-term demand for single family housing. Total starts are forecasted at 114,543 in 2017, 146,141 in 2018, 163,689 in 2019, and 173,499 in 2020.
- Real personal income growth is expected to average 4.4 percent during 2017-2020. Florida's average growth is projected to exceed the national rate by 0.8 percent.
- Retail sales are forecasted to grow at an average pace of over 6.3 percent during 2017-2020, boosted by stronger economic growth, continued recovery in Florida's labor market, and rising household wealth.

The Florida housing market continues to recover. The October 2017 single-family home report released by Florida Realtors® reflects a market for existing housing that continues to tighten and feed solid price appreciation that is approaching the price highs reached during the housing bubble. The median sales price for single-family homes increased \$15,558 in October 2017, year over year, and now stands at \$235,558, a year over year price appreciation of a robust 7.1 percent. Inventories of single-family homes are down from a year ago and are now just 3.8 months, indicating an inventory balance that continues to favor sellers in the single-family market. Distressed sales of single-family homes in the form of short sales continue to plummet year over year, down 36.7 percent, as are foreclosure/REO sales, down 42.3 percent. Traditional sales are up 7.0 percent year over year.

The fundamental underpinnings of the housing market in Florida continue to strengthen. Economic and job growth in Florida are forecasted to continue to outperform the U.S. labor market and more Baby Boomers are expected to migrate southward as they reach the end of their working lives. This bodes well for continued population growth via the in-migration of retirees and job seekers to Florida. The population of Florida is also growing naturally as birth rates exceed death rates. In addition to these sources of domestic population growth, international immigration will also feed the state's population growth.

Overall, the Florida economy has shown considerable resilience. In-migration trends continue to support economic growth, housing, and employment that exceed national averages. A strengthening dollar could yet negatively impact the state's hospitality industry growth as that industry benefits greatly from flows of international tourists. Agriculture in Florida will likely see continued weakness from diminished commodity prices, specifically in the northern region that produces peanuts and cotton, but also in other parts of the state where beef cattle production is more common. The citrus industry in Florida continues to suffer from the effects of greening, with significant transition occurring into other commodities to diversify from single commodity risk.

#### Regional Economy

The Northwest Florida/Panhandle area has a permanent population of 1.4 million and a workforce of over 617,000. The Association's eighteen county region includes almost 25 percent of the state's counties and 20 percent of Florida's land mass. The area economy is driven by tourism, government, and both service and manufacturing industries. Three research universities – Florida State University, Florida A&M

University, and the University of West Florida – provide research in a variety of disciplines. The region's military facilities provide contract opportunities for a number of local, regional and national companies, while also providing a source of skilled and dedicated workers after they separate from the military.

The regional economy has struggled to fully recover from the 2007-2008 recession. Area employment is down 3.1 percent from the pre-recession high and down 1.7 percent from December 2006. By contrast, employment in Florida is up 5.5 percent from the pre-recession high and up 5.7 percent from December 2006. Of the eighteen counties located in the Association's territory, only two have seen employment grow in comparison to pre-recessionary highs. Recent trends are more encouraging, with fifteen of the eighteen counties experiencing stable to increasing job growth over the past twelve months.

Northwest Florida's coastal communities, which suffered very little from the actual effects of the 2010 BP oil spill, saw significant declines in tourism due to the erroneous perception that the entire coast was damaged. The industry has since rebounded to near-record levels during each of the past three years. Following the oil spill, BP agreed to a large settlement fund, which will result in approximately \$1.5 billion in funds available to the eight Northwest Florida coastal counties most heavily affected by the spill. These funds are available to support economic development beginning in 2017.

The region's beaches traditionally pull visitors from within the U.S. Low energy prices should continue to bolster the prospects for domestic tourism. Tropical storms and hurricanes have moderated in recent years, while reparation monies from BP-funded aggressive marketing campaigns have helped bring visitors back to the region.

The outlook for the area nonfarm economy remains generally positive. Anchored by the metro areas of Tallahassee to the east and Pensacola to the west, with local economies in between driven by agriculture, tourism and a strong military base presence, economic growth in the Panhandle is typically less cyclical than peninsular Florida. Positive economic growth in the Tallahassee and Pensacola metro areas is forecasted during the 2017-2020 periods, but at a lower rate than most other metro areas in Florida. Real Gross Metro Product in both metro areas has not yet recovered to pre-recessionary levels.

Much like the state as a whole and the national economy, construction-related employment and business is currently leading growth in the Panhandle. Pensacola area construction jobs are projected to grow at a 4.8 percent average annual rate with similar employment in the Tallahassee region projected at 4.9 percent growth.

Operations at area military bases have generally been expanded over the past several years, and unless there is a significant cut in defense spending, these facilities should continue to be positive economic growth engines for the foreseeable future. With an expanding military presence come various ancillary industries such as Navy Federal Credit Union, which projects that its operations center campus in Escambia County will increase employment from 1,200 positions in 2017 to 5,000 by 2026.

Finally, the absence of a state income tax and the presence of a hospitable climate should help to attract retirees and others to the Panhandle region in the coming years.

#### Agricultural Economy

The agricultural economy in Northwest Florida experienced an average to slightly above average year in 2017. Early row crop production yields are indicating an overall average yield for 2017. Harvest was later than normal due to a wet Spring which delayed planting. In addition, excess rain late in the year further delayed the harvest in some areas. Please see below for information on the primary commodity groups served by the Association.

#### Forestry -

The southern United States continues to be a world leader in traditional and emerging timber products due to a favorable exchange rate and a strong infrastructure of mills, productive forestland, and updated market strategies. "Stumpage" prices for the five major products (pine saw timber, pine chip-n-saw, pine pulpwood, hardwood saw timber, and hardwood pulpwood) all increased in the 4<sup>th</sup> quarter year over year when compared to 2016. Nationally, housing starts continue to trend upward and reached a seasonally adjusted annual rate of 1.326 million in January 2018, which represents the highest rate since October 2016.

#### Row Crops -

World cotton production and demand are estimated to increase in 2017/18, leaving world ending stocks marginally higher than the year before at 87.8 million bales. In the U.S., harvested acreage increased almost 2 million acres to 11.3 million acres and production increased almost 24 percent to 21.3 million bales. The forecast for the marketing year average price received by producers is 69 cents per pound. There were marketing opportunities in the mid 70 cents range; however, these opportunities were brief. IHS Markit forecasts cotton prices will decline in 2018/19.

U.S. corn production is estimated at 14.6 billion bushels in 2017/18, a nominal increase from the previous year and the second largest crop on record. Yields are forecasted at a record 176.6 bushels per acre. The season average corn price received by producers is projected at \$3.25 per bushel, down from \$3.36 in 2016/17. U.S. ending stocks are projected to rise, while world stocks are projected to fall. The majority of the corn grown in Northwest Florida is used for feed and sold locally, often receiving a positive basis resulting in a cash price higher than reported national prices. IHS Markit forecasts corn prices will improve in 2018/19.

#### Livestock -

After reaching a low in 2014, rebuilding of the U.S. cattle herd began in 2015 and continues through 2017. The herd expansion has been spurred by improved pasture conditions, increased market prices, and low feed costs. Net beef supply for 2017 is expected to increase 3.8 percent due to an increase in domestic beef production, a decrease in beef imports and an increase in beef exports. Net beef supply is forecasted to increase a further 3.0 percent in 2018. After falling sharply in 2016, prices are up in 2017 and expected to increase further in 2018. Exposure to swine and poultry within the Association's territory is very limited.

#### Peanuts -

Acreage for peanuts in the U.S. increased to 1.8 million acres in 2017, marking the third highest total on record and the highest planting since 1991. Peanut acreage has increased over the last four years due to PLC program payments and the exclusion of cotton as a covered commodity under the 2014 Farm Bill. The result of 2017 production could be one of the largest peanut crops on record. Yields were above average in Northwest Florida's territory, with local producers contracting for peanuts in the \$475 - \$550 per ton range. Ending stocks are forecasted to increase, likely putting downward pressure on peanut prices for 2018.

#### Dairy -

In 2017, average milk and dairy product prices increased from 2016 levels, reversing the previous two year trend of declining prices. The higher prices are mainly a result of higher exports and increased demand for butter and milk-fats. Production has continued on an increasing trend as the U.S. milk cow herd expands and productivity per cow has increased. Exports are projected to remain steady and will remain a key driver for milk prices. The corn and soybean crop surpluses have resulted in feed costs remaining low, and with an improved price in 2017, margins have increased from 2016 levels. IHS Markit forecasts a mixed outlook for dairy prices in 2018, with milk prices expected to soften and butter and cheese prices to rise.

#### LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners, and farm-related businesses for the financing of short and intermediate-term loans and long-term real estate mortgage loans through numerous product types.

The gross loan volume of the Association as of December 31, 2017 was \$275,112, a decrease of \$2,263 or 0.82 percent compared to \$277,375 at December 31, 2016, which represented an increase of \$1,511 or 0.55 percent compared to \$275,864 at December 31, 2015. Net loans outstanding (gross loans net of the allowance for loan losses) at December 31, 2017 were \$270,510, a decrease of \$2,291 or 0.84 percent compared to \$272,801 at December 31, 2016, which represented an increase of \$1,834 or 0.68 percent compared to \$270,967 at December 31, 2015. Net loans accounted for 94.92 percent of total assets at December 31, 2017, compared to 94.85 percent of total assets at December 31, 2016 and 94.85 percent of total assets at December 31, 2015. The decreases in gross loan volume and net loans outstanding in 2017 were due to a decrease in originated loans, partially offset by increases in purchased participation loans and nonaccrual loans.

The diversification of the Association's loan volume by FCA loan type for each of the past three years is shown in the table below.

|                                  |    |         |         |      | Decembe | er 31,   |    |         |         |  |
|----------------------------------|----|---------|---------|------|---------|----------|----|---------|---------|--|
| Loan Type                        |    | 201     | 7       | 2016 |         |          |    | 2015    |         |  |
|                                  |    |         |         |      |         | ousands) |    |         |         |  |

The geographic distribution of accruing loan volume by branch for the past three years is as follows.

| Branch            | 12/31/17 | 12/31/16 | 12/31/15 |
|-------------------|----------|----------|----------|
| Marianna          | 28.05%   | 29.25%   | 30.77%   |
| Milton            | 26.72    | 27.49    | 28.30    |
| Tallahassee       | 23.00    | 21.45    | 15.90    |
| Monticello        | 9.57     | 9.47     | 9.49     |
| Special Assets    | 0.72     | 1.77     | 6.87     |
| Country Mortgages | 2.64     | 1.94     | 1.44     |
| Capital Markets   | 9.30     | 8.63     | 7.23     |
| Total             | 100.00%  | 100.00 % | 100.00 % |

Commodity and industry categories are based upon the Standard Industrial Classification system published by the federal government. The system is used to assign commodity or industry categories based upon the largest agricultural commodity of the customer.

The major commodities in the Association's loan portfolio are shown below. The predominant commodities are forestry, row crops, livestock, peanuts, and hunting/trapping/game, which together constituted 78 percent of the entire portfolio at December 31, 2017.

|                       | _  |                        |      |    | December | · 31, |            |      |

Repayment ability is closely related to the commodities produced by borrowers and, increasingly, by borrowers' nonfarm income. The Association's loan portfolio contains a large concentration in the forestry industry; however, due to the nonfarm income of borrowers in this industry classification, sources of repayment are varied, reducing the overall risk exposure to this commodity.

During 2017, the Association was active in buying and selling loan participations within and outside of the System. This provides a means for the Association to spread credit concentration risk and realize non-patronage sourced interest and fee income, further strengthening its capital position.

| Loan Participations                              | 2017 2016        |       |               |      | 2015     |
|--|------------------|-------|---------------|------|----------|
|  | (0               | lolla | rs in thousar | ıds) | <u> </u> |
| Participations Purchased  – FCS Institutions     | \$<br>25,252     | \$    | 23,873        | \$   | 19,790   |
| Participations Purchased  - Non-FCS Institutions | 2.467            |       | 2.927         |      | 3,086    |
| Participations Sold                              | (42,428)         |       | (54,129)      |      | (71,690) |
| Total  | \$<br>(14,709) 5 | \$    | (27,329) \$   |      | (48,814) |

The Association did not have any loans sold with recourse, retained subordinated participation interests in loans sold, or interests in pools of subordinated participation interests for the period ended December 31, 2017.

#### CREDIT RISK MANAGEMENT

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. As part of the process to evaluate the success of a loan, the Association reviews the credit quality of the loan portfolio on an ongoing basis. With the approval of the Board of Directors, the Association has established underwriting standards and lending policies that provide direction to loan officers. Underwriting standards include, among other things, an evaluation of:

- Character borrower integrity and credit history
- Capacity repayment capacity of the borrower based on cash flows from operations or other sources of income
- Collateral protection for the lender in the event of default and a potential secondary source of repayment
- Capital ability of the operation to survive unanticipated risks
- Conditions intended use of the loan funds or industry implications

The credit risk management process begins with an analysis of the borrower's credit history, repayment capacity, and financial position. Repayment capacity focuses on the borrower's ability to repay the loan based upon anticipated cash flows from operations or other sources of income, including non-farm income. Real estate loans must be collateralized by a first lien on the real estate (collateral). As required by FCA regulations, each institution that makes loans on a collateralized basis must have collateral evaluation policies and procedures. Real estate mortgage loans may be made only in amounts up to 85 percent of the appraised value of the property taken as collateral or up to 97 percent of the appraised value if guaranteed by a state, federal, or other governmental agency. The actual loan to appraised value when loans are made is generally lower than

the statutory maximum percentage. In addition, each loan is assigned a credit risk rating based upon the Association's underwriting standards. The credit risk rating process incorporates both objective and subjective criteria to identify inherent strengths, weaknesses and risks in loan transactions.

The credit quality of the loan portfolio is reviewed on an ongoing basis as part of the Association's risk management practices. Each loan is classified according to the Uniform Classification System, which is used by all Farm Credit System Institutions. Below are the classification definitions.

- Acceptable Assets are expected to be fully collectible and represent the highest quality.
- Other Assets Especially Mentioned (OAEM) Assets are currently collectible but exhibit some potential weakness.
- Substandard Assets exhibit some serious weakness in repayment capacity, equity, and/or collateral pledged on the loan.
- Doubtful Assets exhibit similar weaknesses to substandard assets. However, doubtful assets have additional weaknesses in existing facts, conditions and values that make collection in full highly questionable.
- Loss Assets are considered uncollectible.

The following table presents selected statistics related to the credit quality of loans including accrued interest at December 31.

| Credit Quality    | 2017    | 2016    | 2015     |
|-------------------|---------|---------|----------|
| Acceptable & OAEM | 96.97%  | 94.63%  | 92.85%   |
| Substandard       | 3.03    | 5.37    | 7.15     |
| Doubtful          |         | =       |          |
| Total             | 100.00% | 100.00% | 100.00 % |
|                   |         |         |          |

#### Nonperforming Assets

The Association's loan portfolio is divided into performing and high-risk categories. The high-risk assets, including accrued interest, are detailed below:

|   | <br>12/31/17       | 12     | 2/31/16        | 12  | 2/31/15        |
|---|--------------------|--------|----------------|-----|----------------|
|   | (de                | ollars | in thousan     | ds) |                |
| High-risk Assets Nonaccrual loans Accruing loans 90 days past due             | \$<br>3,969        | \$     | 1,363          | \$  | 2,693          |
| Total high-risk loans Other property owned                                    | 3,969<br>2,968     |        | 1,363<br>2,940 |     | 2,693<br>1,883 |
| Total high-risk assets  | \$<br>6,937        | \$     | 4,303          | \$  | 4,576          |
| Ratios<br>Nonaccrual loans to total loans<br>High-risk assets to total assets | <br>1.44%<br>2.43% |        | 0.49%<br>1.50% |     | 0.98%<br>1.60% |

Nonaccrual loans represent all loans where there is a reasonable doubt as to the collection of principal and/or future interest accruals under the contractual terms of the loan. In substance, nonaccrual loans reflect loans where the accrual of interest has been suspended. Nonaccrual loans increased \$2,606 or 191.20 percent in 2017. Of the \$3,969 in nonaccrual loan volume at December 31, 2017, \$1,551 or 39.08 percent was current as to scheduled principal and interest payments, compared to (0.37) percent and 4.46 percent at December 31, 2016 and 2015, respectively.

Other property owned (OPO) increased \$28 or 0.95 percent in 2017. During 2017, one property with a book value of \$195 was sold. As of December 31, 2017, OPO consisted of three properties with a book value of \$2,968.

Loan restructuring is available to financially distressed borrowers. Restructuring of loans occurs when the Association grants a concession to a borrower based on either a court order or good faith in a borrower's ability to return to financial viability. The concessions can be in the form of a modification of terms or rates, a compromise of amounts owed, or deed in lieu of foreclosure. Other receipts of assets and/or equity to pay the loan in full or in part are also considered restructured loans. The type of alternative financing structure chosen is based on minimizing the loss incurred by both the Association and the borrower.

#### Allowance for Loan Losses

The allowance for loan losses at each period end was considered by Association management to be adequate to absorb probable losses existing in and inherent to its loan portfolio. The allowance for loan losses is determined according to generally accepted accounting principles.

The following table presents the activity in the allowance for loan losses for the most recent three years:

| Allowance for Loan Loss Activity:  |    | 2017    | 2016        | 2015 |        |  |
|--|----|---------|-------------|------|--------|--|

| Other                            |    | 66    |         | 35         |     | 22    |
| Total loans                      | \$ | 4,602 | \$      | 4,574      | \$  | 4,897 |

The allowance for loan losses as a percentage of loans outstanding and as a percentage of certain other credit quality indicators is shown below:

| Allowance for Loan Losses |         | December 31, |         |
|---------------------------|---------|--------------|---------|
| as a Percentage of:       | 2017    | 2016         | 2015    |
| Total loans               | 1.67%   | 1.65%        | 1.78%   |
| Nonperforming loans       | 77.45%  | 132.81%      | 69.88%  |
| Nonaccrual loans          | 115.95% | 335.58%      | 181.84% |

Please refer to Note 3, *Loans and Allowance for Loan Losses*, of the Notes to the Consolidated Financial Statements, for further information concerning the allowance for loan losses.

#### RESULTS OF OPERATIONS

Net income for the year ended December 31, 2017 totaled \$8,041, an increase of \$1,464 or 22.26 percent compared to net income of \$6,577 for 2016, which represented a decrease of \$222 or 3.27 percent compared to net income of \$6,799 for 2015. The increase in net income from 2016 to 2017 was due to higher noninterest income, lower noninterest expense, and a higher reversal of allowance for loan losses, partially offset by lower net interest income in 2017. The decrease in net income from 2015 to 2016 was due to a lower reversal of allowance for loan losses and lower net interest income, partially offset by higher noninterest income and lower noninterest expense in 2016. Major components of the changes in net income for the past two years are outlined in the following table. Further discussion of each component is provided in the sections below.

| Change in Net Income:                     | 20 | 017-2016   | 2      | 016-2015 |
|---|----|------------|--------|----------|
|   |    | (dollars i | n thou | isands)  |
| Net income (loss) prior year              | \$ | 6,577      | \$     | 6,799    |
| Increase (decrease) in net income due to: |    |            |        |          |
| Interest income                           |    | 165        |        | 267      |
| Interest expense                          |    | 620        |        | 299      |
| Net interest income                       |    | (455)      |        | (32)     |
| Provision for loan losses                 |    | 263        |        | (548)    |
| Noninterest income                        |    | 158        |        | 216      |
| Net gain or losses                        |    | 59         |        | (1)      |
| Noninterest expense                       |    | 1,439      |        | 143      |
| Provision for income taxes                |    | _          |        | _        |
| Total changes in income                   |    | 1,464      |        | (222)    |
| Net income (loss)                         | \$ | 8,041      | \$     | 6,577    |

#### Net Interest Income

Net interest income (before provision for or reversal of allowance for loan loss) for the year ended December 31, 2017 totaled \$8,514, a decrease of \$455 or 5.07 percent compared to net interest income of \$8,969 for 2016, which represented a decrease of \$32 or 0.36 percent compared to net interest income of \$9,001 for 2015. Net interest income is the principal source of earnings for the Association and is impacted by volume, yields on assets and cost of debt.

Net interest income is impacted by changes to interest income and interest expense. Interest income for the year ended December 31, 2017 increased due to higher interest rates and higher average net accruing loans outstanding, partially offset by lower interest income recognized on nonaccrual loans. Interest expense increased for 2017 and outpaced interest income due to higher interest rates and higher average notes

payable outstanding. Interest income for 2016 increased due to higher interest rates and higher average net accruing loans outstanding, partially offset by lower interest income

recognized on nonaccrual loans. Interest expense increased for 2016 and outpaced interest income due to higher interest rates and higher average notes payable outstanding.

The effects of changes in average volume and interest rates on net interest income over the past three years are presented in the following table:

| Change | in | Net | Interest | Income: |
|--------|----|-----|----------|---------|
|--------|----|-----|----------|---------|

|  | V  | olume*    |          | Rate      |        | Total      |

| Change in net interest income                              | \$ | 50        | \$       | (505)     | \$     | (455)      |
| 12/31/16 - 12/31/15<br>Interest income<br>Interest expense | \$ | 240<br>29 | \$       | 27<br>270 | \$     | 267<br>299 |
| Change in net interest income                              | \$ | 211       | \$       | (243)     | \$     | (32)       |

<sup>\*</sup>Volume variances can be the result of increased/decreased loan volume or from changes in the percentage composition of assets and liabilities between periods.

#### Noninterest Income

Noninterest income for each of the three years ended December 31 is shown in the following table:

| For the Year Ended |       |   |                | Percentage<br>Increase/(Decrease) |                                |   |   |
|--------------------|-------|---|----------------|-----------------------------------|--------------------------------|---|---|
|                    |       | Dece  | mber 31        | ,                                 |                                | 2017/   | 2016/   |
|                    | 2017  |   | 2016           |                                   | 2015                           | 2016  | 2015  |
|                    | (dol  | lars  | in thousa      | nds)                              |                                |   |   |
| \$                 | 72    | \$  | 79             | \$                                | 99                             | (8.86)%   | (20.20)%  |
|                    | 3,708 |   | 3,511          |                                   | 3,282                          | 5.61  | 6.98  |
|                    | 289   |   | 222            |                                   | 222                            | 30.18   | _   |
| \$                 | 4,069 | \$  | 3,812          | \$                                | 3,603                          | 6.74 %  | 5.80 %  |
|                    | \$    | 2017<br>\$\begin{align*} (dol\) \$\begin{align*} 72\\ 3,708\\ 289\end{align*} | 2017  (dollars | December 31                       | December 31,   2016       2016 | December 31,           2017         2016         2015           (dollars in thousands)         9           3,72         79         99           3,708         3,511         3,282           289         222         222 | For the Year Ended   2017   2017   2016   2015   2016 |

Noninterest income for the year ended December 31, 2017 totaled \$4,069, an increase of \$257 or 6.75 percent compared to \$3,812 in 2016, which represented an increase of \$209 or 5.80 percent compared to noninterest income of \$3,603 in 2015. The increase in noninterest income for both 2017 and 2016 was due to increases in patronage refunds and gains on the sale of rural home loans, partially offset by decreases in other components of noninterest income, higher losses on sales of premises and equipment and higher losses on other transactions. Special patronage refunds from AgFirst totaled \$1,876 in 2017, \$1,223 in 2016, and \$1,279 in 2015. These special patronage distributions are expected to decrease in future years.

#### Noninterest Expense

Noninterest expense for each of the three years ended December 31 is shown in the following table:

|                                | For the Year Ended |              |       | Percentage<br>Increase/(Decreas |         |  |
|--------------------------------|--------------------|--------------|-------|---------------------------------|---------|--|
|                                | Dec                | ember 31,    |       | 2017/                           | 2016/   |  |
| Noninterest Expense            | 2017               | 2016         | 2015  | 2016                            | 2015    |  |
|                                | (dollar            | s in thousar | nds)  |                                 |         |  |
| Salaries and employee benefits | \$ 3,131 \$        | 3,250 \$     | 3,271 | (3.66)%                         | (0.64)% |  |
| Postretirement benefits        | (173)              | 926          | 989   | (118.68)                        | (6.37)  |  |
| Occupancy and equipment        | 270                | 273          | 278   | (1.10)                          | (1.80)  |  |
| Insurance Fund premiums        | 286                | 322          | 246   | (11.18)                         | 30.89   |  |
| (Gains) losses on OPO          | 61                 | 21           | 27    | 190.48                          | (22.22) |  |
| Other operating expenses       | 1,285              | 1,467        | 1,597 | (12.41)                         | (8.14)  |  |
| Total noninterest expense      | \$ 4,860 \$        | 6,259 \$     | 6,408 | (22.35)%                        | (2.33)% |  |

Salaries and employee benefits decreased by \$119 or 3.66 percent in 2017 due to a decrease in employee benefit expense, partially offset by an increase in salaries. Postretirement benefits decreased by \$1,099 or 118.68 percent. During 2017, the method of recording expenses for the Association's defined benefit pension plan and other postretirement benefit plan was modified. This change resulted in the reduction of Other Assets by \$629 and the reduction of Other Liabilities by \$1,401 on the Association's Balance Sheets, and a corresponding reduction of postretirement benefit costs on the Association's Statements of Income of \$772 during 2017. Refer to Note 9, *Employee Benefit Plans*, of the Notes to the Consolidated Financial Statements, for further information concerning postretirement benefit expenses.

Occupancy and equipment expense decreased by \$3 or 1.10 percent, reflecting lower maintenance, utilities and rental expense, partially offset by higher depreciation expense. Insurance fund premiums decreased by \$36 or 11.18 percent due to a decrease in the base premium factor charged by the Farm Credit System Insurance Corporation, partially offset by higher average notes payable balances. Losses on OPO increased by \$40 or 190.48 percent due to higher expenses and reduced gains on the sale of other property owned. Other operating expenses decreased by \$182 or 12.41 percent due primarily to reduced expenses and miscellaneous recoveries.

#### Income Taxes

The Association recorded no income tax provision or benefit for the year ended December 31, 2017, compared to \$0 for 2016 and \$0 for 2015.

Refer to Note 2, Summary of Significant Accounting Policies, Income Taxes, of the Notes to the Consolidated Financial Statements, for more information concerning Association income taxes.

Key Results of Operations Comparisons

Key results of operations comparisons for each of the twelve month periods ended December 31 are shown in the following table:

| Van Danaka af                                 | For the<br>12 Months<br>Ended | For the<br>12 Months<br>Ended | For the<br>12 Months<br>Ended |
|---|-------------------------------|-------------------------------|-------------------------------|
| Key Results of<br>Operations Comparisons      | 12/31/17                      | 12/31/16                      | 12/31/15                      |
| Return on Average Assets                      | 2.83%                         | 2.33%                         | 2.44%                         |
| Return on Average Members' Equity             | 9.45%                         | 7.82%                         | 8.17%                         |
| Net Interest Income as a Percentage           |                               |                               |                               |
| of Average Earning Assets                     | 3.07%                         | 3.26%                         | 3.33%                         |
| Net (Charge-offs) Recoveries to Average Loans | 0.125%                        | (0.098)%                      | 0.310%                        |

The return on average assets and return on average members' equity for the year ended December 31, 2017 increased from 2016, due primarily to the increased reversal of allowance for loan losses, higher noninterest income, and lower noninterest expense, partially offset by lower net interest income. The decreased returns on average assets and average members' equity for 2016 were due primarily to the reduced reversal of allowance for loan losses, lower net interest income, and higher average assets and equity, partially offset by higher noninterest income and lower noninterest expense. Key factors in the growth of net income for future years will be quality loan growth, adequate net interest margins, operating expense control, and improvement in noninterest income. The Association's goal is to generate earnings sufficient to fund operations, adequately capitalize the Association, and achieve a desirable rate of return for members. To meet this goal, the Association must attract and maintain high quality loan volume priced at competitive rates and manage credit risk across the entire portfolio, while efficiently meeting the credit needs of members.

#### LIQUIDITY AND FUNDING SOURCES

#### Liquidity and Funding

The principal source of funds for the Association is the borrowing relationship established with the Bank through the General Financing Agreement (GFA). The GFA utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The Bank advances the funds to the Association, creating notes payable (or direct loans) to the Bank. The Bank manages interest rate risk through direct loan pricing and asset/liability management. The notes payable are segmented into variable rate and fixed rate components. The variable rate note is utilized by the Association to fund variable rate loan advances and operating funds requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by

the Association. Association capital levels effectively create a borrowing margin between the amount of loans outstanding and the amount of notes payable outstanding. This margin is commonly referred to as "Loanable Funds."

The total notes payable to the Bank at December 31, 2017 were \$193,164 compared to \$198,227 at December 31, 2016 and \$196,766 at December 31, 2015. The 2017 decrease of \$5,063 or 2.55 percent compared to December 31, 2016 was due primarily to a decrease in net loans and an increase in other liabilities. The 2016 increase of \$1,461 or 0.74 percent compared to December 31, 2015 was due primarily to an increase in net loans.

The average volume of notes payable to the Bank was \$195,017, \$193,367 and \$192,057 for the years ended December 31, 2017, 2016 and 2015, respectively. Refer to Note 6, *Notes Payable to AgFirst Farm Credit Bank*, of the Notes to the Consolidated Financial Statements, for weighted average interest rates and maturities, and additional information concerning the Association's notes payable.

Liquidity management is the process whereby funds are made available to meet all financial commitments including the extension of credit, payment of operating expenses and payment of debt obligations. The Association receives access to funds through its borrowing relationship with the Bank and from income generated by operations. The liquidity policy of the Association is to manage cash balances to maximize debt reduction and to increase loan volume. As borrower payments are received, they are applied to the Association's note payable with the Bank.

The Association had no lines of credit outstanding with third parties as of December 31, 2017.

#### Funds Management

The Bank and the Association manage assets and liabilities to provide a broad range of loan products and funding options, which are designed to allow the Association to be competitive in all interest rate environments. The primary objective of the asset/liability management process is to provide stable and rising earnings, while maintaining adequate capital levels by managing exposure to credit and interest rate risks.

Demand for loan types is a driving force in establishing a funds management strategy. The Association offers fixed, adjustable and variable rate loan products that are marginally priced according to financial market rates. Variable rate loans may be indexed to market indices such as the Prime Rate or the 90-day London Interbank Offered Rate (LIBOR). Adjustable rate mortgages are indexed to U.S. Treasury Rates. Fixed rate loans are priced based on the current cost of System debt of similar terms to maturity.

The majority of the interest rate risk in the Association's Consolidated Balance Sheets is transferred to the Bank through the notes payable structure. The Bank, in turn, actively utilizes funds management techniques to identify, quantify and control interest rate risk associated with the loan portfolio.

The Association's net interest income as a percentage of average earning assets decreased from 3.26 percent for the year ended December 31, 2016 to 3.07 percent for the year ended December 31, 2017. The decrease reflected lower income from

nonaccrual loans and lower net interest rates on accruing loans in 2017 compared to 2016.

Relationship with the Bank

The Association's statutory obligation to borrow only from the Bank is discussed in Note 6, *Notes Payable to AgFirst Farm Credit Bank*, of the Notes to the Consolidated Financial Statements in this Annual Report.

The Bank's ability to require additional capital contributions from the Association is discussed in Note 4, *Investment in Other Farm Credit Institutions*, of the Notes to the Consolidated Financial Statements.

The Bank's role in mitigating the Association's exposure to interest rate risk is described in the "Liquidity and Funding" section of this Management's Discussion and Analysis and in Note 6, *Notes Payable to AgFirst Farm Credit Bank*, included in this Annual Report.

The Association has an agreement with the Bank whereby the Bank may provide certain fiscal, personnel, accounting, marketing, communication, public relations, information management, computer and certain other services as requested by the Association. Specific services currently provided by the Bank to the Association, in which each service provided would constitute a material interdependent relationship, include information management, computer services/hosting, payroll processing and related payroll tax services.

#### CAPITAL RESOURCES

Capital serves to support asset growth and provide protection against unexpected credit and interest rate risk and operating losses. Capital is also needed for future growth and investment in new products and services.

The Association's Board of Directors establishes, adopts, and maintains a formal written capital adequacy plan to ensure that adequate capital is maintained for continued financial viability,

to provide for growth necessary to meet the needs of member/borrowers, and to ensure that all stockholders are treated equitably. There were no material changes to the capital plan for 2017 that would affect minimum stock purchases or would have an effect on the Association's ability to retire stock and distribute earnings.

In 2017, total members' equity increased \$406 or 0.49 percent to \$83,475 at December 31, 2017. In 2016, total members' equity increased \$581 or 0.70 percent to \$83,069 at December 31, 2016. The increases for 2017 and 2016 were due to net income retained in excess of distributions to members.

Total capital stock and participation certificates were \$951 on December 31, 2017, compared to \$884 on December 31, 2016 and \$857 on December 31, 2015. The changes are reflective of the stock and participation certificate requirements as existing loans are repaid and new loans are made.

FCA sets minimum regulatory capital requirements for System banks and associations. Capital adequacy is evaluated using a number of regulatory ratios. According to FCA regulations, each institution's permanent capital ratio is calculated by dividing permanent capital by a risk-adjusted asset base. Risk adjusted assets mean the total dollar amount of the institution's assets adjusted by an appropriate credit conversion factor as defined by regulation. For all periods presented, the Association exceeded minimum regulatory standards for all capital ratios.

Effective January 1, 2017, the regulatory capital requirements for System Banks and associations were modified. The new regulations ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted. New regulations replaced core surplus and total surplus ratios with common equity tier 1 (CET1) capital, tier 1 capital and total capital risk-based capital ratios. The new regulations also include a tier 1 leverage ratio and an unallocated retained earnings equivalents (UREE) leverage ratio. The permanent capital ratio remains in effect.

The following sets forth the regulatory capital ratios which were effective January 1, 2017 and the Association's capital ratios as of December 31, 2017:

| Ratio                   | Minimum<br>Requirement | Capital<br>Conservation<br>Buffer* | Minimum Requirement<br>with Capital<br>Conservation Buffer | Association Capital Ratios as of December 31, 2017 |
|-------------------------|------------------------|------------------------------------|--|--|
| Risk-adjusted ratios:   |                        |                                    |  |  |
| CET1 Capital Ratio      | 4.5%                   | 0.625%                             | 5.125%   | 27.91%   |
| Tier 1 Capital Ratio    | 6.0%                   | 0.625%                             | 6.625%   | 27.91%   |
| Total Capital Ratio     | 8.0%                   | 0.625%                             | 8.625%   | 29.16%   |
| Permanent Capital Ratio | 7.0%                   | 0.0%                               | 7.0%   | 28.26%   |
| Non-risk-adjusted:      |                        |                                    |  |  |
| Tier 1 Leverage Ratio   | 4.0%                   | 1.0%                               | 5.0%   | 28.81%   |
| UREE Leverage Ratio     | 1.5%                   | 0.0%                               | 1.5%   | 25.32%   |

<sup>\*</sup> The capital conservation buffers have a 3 year phase-in period and will become fully effective January 1, 2020. Risk-adjusted ratio minimums will increase 0.625% each year until fully phased in. There is no phase-in period for the tier 1 leverage ratio.

If capital ratios fall below the minimum regulatory requirements, including the buffer amounts, capital distributions (equity redemptions, dividends, and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

The following sets forth regulatory capital ratios as previously reported:

|                         | Regulatory<br>Minimum | 2016   | 2015   | 2014   | 2013   | 2012   |
|-------------------------|-----------------------|--------|--------|--------|--------|--------|
| Permanent Capital Ratio | 7.00%                 | 28.21% | 28.26% | 28.77% | 26.26% | 22.79% |
| Total Surplus Ratio     | 7.00%                 | 27.90% | 27.98% | 28.46% | 25.97% | 22.48% |
| Core Surplus Ratio      | 3.50%                 | 27.90% | 26.95% | 26.26% | 24.57% | 21.60% |

See Note 7, Members' Equity, of the Consolidated Financial Statements, for further information concerning capital resources.

#### PATRONAGE PROGRAM

Prior to the beginning of any fiscal year, the Association's Board of Directors, by adoption of a resolution, may establish a patronage allocation program to distribute its available consolidated net earnings. This resolution provides for the application of net earnings in the manner described in the Association's Bylaws. This includes the setting aside of funds to increase surplus to meet minimum capital adequacy standards established by FCA Regulations, to increase surplus to meet Association capital adequacy standards to a level necessary to support competitive pricing at targeted earnings levels, and for reasonable reserves for necessary purposes of the Association. After consideration of these capital needs, net earnings are eligible for allocation to borrowers. Refer to Note 7, Members' Equity, of the Notes to the Consolidated Financial Statements, for more information concerning patronage distributions. The Association declared patronage distributions of \$4.0 million in 2017. Patronage distributions of \$3.0 million were declared in 2016 and \$3.0 million in 2015.

## YOUNG, BEGINNING AND SMALL FARMERS AND RANCHERS PROGRAM

The Association's mission includes providing sound and constructive credit to Young, Beginning and Small (YBS) farmers and ranchers. The Board of Directors and management are responsible to ensure that the Association is making appropriate efforts to implement an effective YBS program. The Board of Directors approves YBS policies, as well as the annual business plan, which outline strategies to accomplish the YBS mission and goals, and measure the program's performance. As part of its YBS program, the Association also seeks to provide financing to underserved commodities and local food hubs within its territory, many of which are operated by YBS farmers and ranchers.

#### Definitions

<u>Young Farmer</u>: A farmer, rancher, or producer or harvester of aquatic products who is 35 years of age or less as of the date the loan is originally made.

<u>Beginning Farmer</u>: A farmer, rancher, or producer or harvester of aquatic products whose experience in farming or ranching as of the date the loan is originally made is 10 years or less.

<u>Small Farmer</u>: A farmer, rancher, or producer or harvester of aquatic products who normally generates less than \$250 thousand in annual gross sales of agricultural or aquatic products as of the date the loan is originally made.

#### YBS Program Strategies

The Association's YBS Farmer and Rancher Program complies with statutory and regulatory requirements which include program goals for quantitative measurements of the number and volume of YBS loans and strategies the Association will employ to meet program objectives.

The Association's YBS Farmer and Rancher Policy provides that loans for this segment will be underwritten according to normal commodity-based standards. Since these groups may have weaker credit factors, consideration has been given in regard to certain financial benchmarks that are traditionally weaker for the YBS segment. The Association's policy provides pricing and fee concessions for production-oriented YBS borrowers. Association staff works with otherwise qualified YBS applicants to offset weaknesses through additional obligors, additional pledges of collateral, or through obtaining FSA loan guarantees. The Association is an approved FSA lender. The Association's Board of Directors and management continue to evaluate the YBS Farmer and Rancher Policy to determine if additional lending inducements can be added in a manner that still provides for safe and constructive financing.

In 2017, the Association continued to place emphasis on "hands-on" involvement in agricultural events and affiliations in our chartered territory that have a tie to young, beginning, and small farmers and ranchers. The Association actively participated in agricultural events through sponsorships and speaking engagements as exhibitors, volunteers, and through staff attendance. The Association worked both independently and in cooperation with agriculturally focused affiliates and educational systems in the territory. Association members can expect this level of participation to continue throughout 2018.

In complementary initiatives, the YBS Advisory Committee continued to provide input to the Association's Board of Directors regarding future YBS policy development and program planning. The YBS Advisory Committee will continue meeting in 2018. The Association's Internship Program functions in cooperation with agriculturally affiliated colleges. The Internship Program was continued in 2017 and the Association anticipates carrying the program forward.

2018 strategies for meeting program objectives include:

- Continue to periodically evaluate the effectiveness of the YBS Policy and Program and provide consideration for YBS Advisory Committee input into the policy and program.
- Host or co-host educational seminars for YBS farmers and ranchers within the territory.

- Lender participation in YBS events to teach skills important to agriculture and promote Farm Credit products and services.
- YBS Volunteer Program that encourages non-lending staff to participate in events that educate about and/or promote agriculture.

#### YBS Program Quantitative Goals

When planning for 2017, the Association anticipated continuing to market and originate loans to YBS farmers and ranchers. However, because the trend of new loans being originated continues to be smaller than loans that are being liquidated, the Association also projected that there would be an approximate 30 percent decrease in loan volume classified in each of the Young, Beginning and Small lending categories. In 2017, the Association maintained the number of loans to Young farmers, while increasing the number of outstanding loans to Beginning and Small farmers. During 2017, the Association was able to increase the outstanding loan volume to Beginning farmers, while there was a decrease in the outstanding loan volume to Young and Small Farmers. For 2018, the Association projects a decrease in loan volume for each of the three categories.

The following charts show: Specific changes in the number of loans and the volume of loans in the Young, Beginning and Small categories during 2017; 2017 year-end number and volume of loans by Young, Beginning and Small categories; and 2018 quantitative goals for YBS.

Specific Changes in YBS Categories in 2017:

|                    | Increase/(Decrease) # Loans |                      | ase/(Decrease)<br>oan Volume |
|--------------------|-----------------------------|----------------------|------------------------------|
| Young              | (1)<br>42                   | (dollars<br>\$<br>\$ | (1,248)<br>2.587             |
| Beginning<br>Small | 58                          | \$                   | (735)                        |

Association Volume and Number of YBS Loans as of December 31, 2017:

|           | # of<br>YBS Loans |         | Volume<br>BS Loans |
|-----------|-------------------|---------|--------------------|
|           |                   | (dollar | s in thousands)    |
| Young     | 167               | \$      | 18,936             |
| Beginning | 552               | \$      | 71,800             |
| Small     | 829               | \$      | 124,811            |

2018 Quantitative Goals for YBS:

|           | # of<br>YBS Loans |          | Volume<br>BS Loans |  |  |
|-----------|-------------------|----------|--------------------|--|--|
|           |                   | (dollars | in thousands)      |  |  |
| Young     | 170               | \$       | 18,692             |  |  |
| Beginning | 572               | \$       | 71,156             |  |  |
| Small     | 845               | \$       | 122,252            |  |  |

For purposes of the above tables, a loan could be included in more than one of the categories depending on the characteristics of the underlying borrower.

Association Comparison to YBS Territorial Demographics

Association Market Share as of December 31, 2017:

|           | 2012 Ag<br>Census | Association<br>Loans<br>"In Territory" | Market Share<br>Percentage |
|-----------|-------------------|--|----------------------------|
| Young     | 253               | 164                                    | 64.82%                     |
| Beginning | 1,837             | 526                                    | 28.63%                     |
| Small     | 7,148             | 795                                    | 11.12%                     |

The 2012 USDA Ag Census data has been used as a benchmark to measure penetration of the Association's YBS Program efforts. The Ag Census is taken every five years by mailing report forms to farm and ranch operators. For purposes of the census, a farm is any place from which \$1,000 or more of agricultural products were produced or sold, or normally would have been sold during the census year. This is similar to how the Association defines an agricultural borrower. The Association's designation as being "in territory" is tied to the borrower having a farm operation headquartered or some agricultural involvement in one of the eighteen counties that comprises the Association's chartered territory. For purposes of the comparison above, the Ag Census data and the Association's numbers are not determined using exactly the same methodology. Market share percentages may be distorted due to a farm (that would be counted once in the census) potentially having more than one loan with the Association.

#### YBS Program Summary

In summary, the Association will place continued emphasis on involvement in agricultural activities occurring within its territory, in implementing an effective YBS Program to help YBS farmers and ranchers receive sound and constructive credit, and in reaching out in partnership to area educational systems that have agriculturally-affiliated programs. The Association will work diligently to meet its YBS mission statement of: "Helping Rural America Grow by supporting diversity and inclusion in agriculture".

#### REGULATORY MATTERS

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The FCA expects to issue a final regulation in 2018. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations,
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption,
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers,
- To comply with the requirements of section 939A of the Dodd-Frank Act,
- To modernize the investment eligibility criteria for System banks, and
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

#### FINANCIAL REGULATORY REFORM

Derivatives transactions are subject to myriad regulatory requirements including, among other things, clearing through a third-party central clearinghouse trading on regulated exchanges or other multilateral platforms. Margin is required for these transactions. Derivative transactions that are not subject to mandatory trading and clearing requirements may be subject to minimum margin and capital requirements.

The Commodity Futures Trading Commission and other federal banking regulators have exempted System institutions from certain, but not all, of these new requirements, including for swaps with members, mandatory clearing and minimum margin for non-cleared swaps.

Notwithstanding these exceptions, counterparties of System institutions may require margin or other forms of credit support as a condition to entering into non-cleared transactions because such transactions may subject these counterparties to more onerous capital, liquidity and other requirements absent such margin or credit support. Alternatively, these counterparties may pass on the capital and other costs associated with entering

into transactions if insufficient margin or if other credit support is not provided.

The Dodd-Frank Act also created a new federal agency called the Consumer Financial Protection Bureau (CFPB). The CFPB is responsible for regulating the offering of consumer financial products or services under federal consumer financial laws. The Farm Credit Administration retains the responsibility to oversee and enforce compliance by System institutions with relevant rules adopted by the CFPB.

The regulatory requirements that apply to derivatives transactions could affect funding and hedging strategies and increase funding and hedging costs.

## RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 2, Summary of Significant Accounting Policies, in the Notes to the Consolidated Financial Statements for recently issued accounting pronouncements.

The following Accounting Standards Updates (ASUs) were issued by the Financial Accounting Standards Board (FASB) but have not yet been adopted:

#### ASU 2016-13 - Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments

- Replaces multiple existing impairment standards by establishing a single framework for financial assets to reflect management's estimate of current expected credit losses (CECL) over the complete remaining life of the financial assets.
- Changes the present incurred loss impairment guidance for loans to a CECL model.
- The Update also modifies the other-than-temporary impairment model for debt securities to require an allowance for credit impairment instead of a direct write-down, which allows for reversal of credit impairments in future periods based on improvements in credit.
- Eliminates existing guidance for purchased credit impaired (PCI) loans, and requires recognition of an allowance for expected credit losses on these financial assets.
- Requires a cumulative-effect adjustment to retained earnings as of the beginning of the reporting period of adoption.
- Effective for fiscal years beginning after December 15, 2020, and interim
  periods within those fiscal years. Early application will be permitted for
  fiscal years, and interim periods within those fiscal years, beginning after
  December 15, 2018.

- The Association has begun implementation efforts by establishing a crossdiscipline governance structure. The Association is currently identifying key interpretive issues, and assessing existing credit loss forecasting models and processes against the new guidance to determine what modifications may be required.
- The Association expects that the new guidance will result in an increase in its allowance for credit losses due to several factors, including:
  - The allowance related to loans and commitments will most likely increase to cover credit losses over the full remaining expected life of the portfolio, and will consider expected future changes in macroeconomic conditions.
  - An allowance will be established for estimated credit losses on debt securities.
  - The nonaccretable difference on any PCI loans will be recognized as an allowance, offset by an increase in the carrying value of the related loans.
- The extent of the increase is under evaluation, but will depend upon the nature and characteristics of the Association's portfolio at the adoption date, and the macroeconomic conditions and forecasts at that date.
   The Association expects to adopt the guidance in first quarter 2021.

#### ASU 2016-02 – Leases (Topic 842)

- Requires lessees to recognize leases on the balance sheet with lease liabilities and corresponding right-of-use assets based on the present value of lease payments.
- Lessor accounting activities are largely unchanged from existing lease accounting.
- The Update also eliminates leveraged lease accounting but allows existing leveraged leases to continue their current accounting until maturity, termination or modification.
- Also, expands qualitative and quantitative disclosures of leasing arrangements.
- Requires adoption using a modified cumulative effect approach wherein the guidance is applied to all periods presented.
- Effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted.
- The practical expedients allow entities to largely account for existing leases consistent with current guidance, except for the incremental balance sheet recognition for lessees.
- The Association has started its implementation of the Update which has included an initial evaluation of leasing contracts and activities.
- As a lessee the Association is developing its methodology to estimate the right-of use assets and lease liabilities, which is based on the present value of lease payments but does not expect a material change to the timing of expense recognition.
- Given the limited changes to lessor accounting, the Association does not expect material changes to recognition or measurement, but it is early in the implementation process and the impact will continue to be evaluated.
- The Association is evaluating existing disclosures and may need to provide additional information as a result of adopting the Update.
- The Association expects to adopt the guidance in first quarter 2019 using the modified retrospective method and practical expedients for transition.

#### ASU 2016-01 - Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities

- The Update amends the presentation and accounting for certain financial instruments, including liabilities measured at fair value under the fair value option and equity investments.
- Requires certain equity instruments be measured at fair value, with changes in fair value recognized in earnings.
- The guidance also updates fair value presentation and disclosure requirements for financial instruments measured at amortized cost.
- Effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years.
- The Association is currently evaluating any impacts to the financial statements. The Association's implementation efforts include the identification of securities within the scope of the guidance, the evaluation of the measurement alternative available for equity securities without a readily determinable fair value, and the related impact to accounting policies, presentation, and disclosures.
- Any investments in nonmarketable equity investments accounted for under the cost method of accounting (except for other Farm Credit Institution stock) will be accounted for either at fair value with unrealized gains and losses reflected in earnings or, if elected, using an alternative method. The alternative method is similar to the cost method of accounting, except that the carrying value is adjusted (through earnings) for subsequent observable transactions in the same or similar investment. The Association is currently evaluating which method will be applied to these nonmarketable equity investments.
- Additionally, for purposes of disclosing the fair value of loans carried at amortized cost, the Association is evaluating valuation methods to determine the necessary changes to conform to an "exit price" notion as required by the Standard. Accordingly, the fair value amounts disclosed for such loans may change upon adoption.
- The Association expects to adopt the guidance in first quarter 2018 with a
  cumulative-effect adjustment to retained earnings as of the beginning of
  the year of adoption, except for changes related to nonmarketable equity
  investments, which is applied prospectively. The Association expects the
  primary accounting changes will relate to equity investments.

#### ASU 2014-09 - Revenue from Contracts With Customers (Topic 606) and subsequent related Updates

- Requires that revenue from contracts with customers be recognized upon transfer of control of a good or service, and transfers of nonfinancial assets, in an amount equaling the consideration expected to be received.
- Changes the accounting for certain contract costs, including whether they
  may be offset against revenue in the Consolidated Statements of Income,
  and requires additional disclosures about revenue and contract costs.
- May be adopted using a full retrospective approach or a modified, cumulative effect approach wherein the guidance is applied only to existing contracts as of the date of initial application, and to new contracts transacted after that date.
- Effective for reporting periods beginning after December 15, 2017. Early application is not permitted.
- The Association's revenue is the sum of net interest income and noninterest income. The scope of the guidance explicitly excludes net interest income as well as many other revenues for financial assets and liabilities including loans, leases, securities, and derivatives. Accordingly, the majority of the Association's revenues will not be affected.
- The Association is performing an assessment of revenue contracts as well
  as working with industry participants on matters of interpretation and
  application. Accounting policies will not change materially since the
  principles of revenue recognition from the Update are largely consistent
  with existing guidance and current business practices. The Association has
  not identified material changes to the timing or amount of revenue
  recognition.
- The Association expects a minor change to the presentation of costs for certain underwriting activities which will be presented in expenses rather than the current presentation against the related revenues. The Association will provide qualitative disclosures of performance obligations related to revenue recognition and will continue to evaluate disaggregation for significant categories of revenue in the scope of the guidance.
- The Association intends to adopt the guidance in first quarter 2018 using the modified retrospective method with a cumulative-effect adjustment to opening retained earnings.

## Disclosure Required by Farm Credit Administration Regulations

#### **Description of Business**

Descriptions of the territory served, persons eligible to borrow, types of lending activities engaged in, financial services offered and related Farm Credit organizations are incorporated herein by reference to Note 1, *Organization and Operations*, of the Consolidated Financial Statements included in this Annual Report to shareholders.

The description of significant developments that had or could have a material impact on earnings or interest rates to borrowers, acquisitions or dispositions of material assets, material changes in the manner of conducting the business, seasonal characteristics, and concentrations of assets, if any, is incorporated in "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in this Annual Report.

The Association wholly owns one unincorporated business entity (UBE), as follows: East Wing Ranch, LLC is a Florida limited liability company which was organized for the purpose of holding net acquired property owned by the Association.

#### **Description of Property**

The following table sets forth certain information regarding the properties of the reporting entity, all of which are located in Florida:

| Location                             | Description               | Form of<br>Ownership |
|--------------------------------------|---------------------------|----------------------|
| 5052 Hwy. 90 East<br>Marianna        | Administrative/<br>Branch | Owned                |
| 5336 Stewart Street, SE<br>Milton    | Branch                    | Owned                |
| 925 W. Washington<br>Monticello      | Branch                    | Owned                |
| 3323 Thomasville Road<br>Tallahassee | Branch                    | Owned                |
| 3927 Highway 4, Suite 103<br>Jay     | Branch                    | Leased               |

#### **Legal Proceedings**

Information, if any, to be disclosed in this section is incorporated herein by reference to Note 11, *Commitments and Contingencies*, of the Consolidated Financial Statements and Note 14, *Regulatory Enforcement Matters*, of the Consolidated Financial Statements included in this Annual Report.

#### **Description of Capital Structure**

Information to be disclosed in this section is incorporated herein by reference to Note 7, *Members' Equity*, of the Consolidated Financial Statements included in this Annual Report.

#### **Description of Liabilities**

The description of liabilities, contingent liabilities and intrasystem financial assistance rights and obligations to be disclosed in this section is incorporated herein by reference to Notes 2, 6, 9 and 11 of the Consolidated Financial Statements included in this Annual Report.

## Management's Discussion and Analysis of Financial Condition and Results of Operations

"Management's Discussion and Analysis of Financial Condition and Results of Operations," which appears in this Annual Report and is to be disclosed in this section, is incorporated herein by reference.

#### Senior Officers

The following represents certain information regarding the executive officers of the Association:

| Senior Officers         | Position & Other Business Interests  |
|-------------------------|--|
| Ricky Bitner            | President & Chief Executive Officer since January 1, 2009.<br>Mr. Bitner serves as a director of Florida's Great Northwest, a regional economic development organization.  |
| John Mottice            | Chief Financial Officer since April 2014. Capital Markets Officer from April 2011 thru March 2014. Mr. Mottice serves as President and Director of Centre Pointe Office Condominium Association, Inc., an owners' association for an office condominium project, and as President of Stark-Pike, Inc., a general partner for a family-owned limited partnership. |
| Chuck Thiele            | Chief Credit Officer since March 2013. Credit Administrator from January 2010 thru February 2013.  |
| DeAndrea Barber         | Chief Operations Officer since March 2013. Policy and Operations Manager from January 2010 thru February 2013. Loan Operations Manager from December 2005 thru December 2009.  |
| Dorislynn White-Padgett | Manager of Human Capital since March 2014. Senior<br>Human Resource Administrator from January 2012 thru<br>February 2014. Regional Loan Operations Supervisor from<br>June 2007 thru December 2012.   |
| Jesse Dumas             | Regional Lending Manager (Eastern Region) since August 2017. Regional Lending Manager for Tallahassee and Monticello from April 2011 thru July 2017.   |
| Michael Digmon          | Regional Lending Manager (Western Region) since August<br>2017. Principal Loan Officer from April 2013 thru July<br>2017. Prior to April 2013, Mr. Digmon worked as an<br>investment advisor with Edward Jones.  |

With the exception of Mr. Digmon, the business experience for the past five years for executive officers is with the Farm Credit System. The total amount of compensation earned by the CEO and the highest paid officers as a group during the years ended December 31, 2017, 2016 and 2015, is as follows:

| Name of<br>Individual or |      |                  |         | D  | eferred | C   | hange in    | Perq./       |                 |
|--------------------------|------|------------------|---------|----|---------|-----|-------------|--------------|-----------------|
| Number in Group          | Year | Salary           | Bonus   | (  | Comp.   | Pen | sion Value* | Other**      | Total           |
| Ricky Bitner             | 2017 | \$<br>244,691 \$ | 29,815  | \$ | 1,110   | \$  | -           | \$<br>9,287  | \$<br>284,903   |
| Ricky Bitner             | 2016 | \$<br>225,869 \$ | 33,880  | \$ | _       | \$  | 853         | \$<br>9,233  | \$<br>269,835   |
| Ricky Bitner             | 2015 | \$<br>218,369 \$ | 36,203  | \$ | -       | \$  | 494         | \$<br>8,699  | \$<br>263,765   |
| 6                        | 2017 | \$<br>662,146 \$ | 91,670  | \$ | _       | \$  | 99,579      | \$<br>14,956 | \$<br>868,352   |
| 7                        | 2016 | \$<br>682,500 \$ | 107,861 | \$ | -       | \$  | 177,931     | \$<br>51,652 | \$<br>1,019,944 |
| 6                        | 2015 | \$<br>646,925 \$ | 85,113  | \$ | _       | \$  | 60,478      | \$<br>24,204 | \$<br>816,720   |

<sup>\*</sup> The changes in pension values as reflected in the table above resulted primarily from changes in the actuarial assumptions for mortality and discount rate. See further discussion under Retirement and Deferred Compensation Plans below and in Note 9, Employee Benefit Plans, of the Consolidated Financial Statements included in this Annual Report.

The disclosure of information on the total compensation paid during 2017 to any senior officer or to any other employee included in the aggregate group total as reported in the table above is available and will be disclosed to the shareholders of the institution upon request.

On February 4, 2015, the FCA Board approved the final rule, "Disclosure to Shareholders; Pension Benefit Disclosures." The rule amends FCA regulations to exclude employee compensation from being reported in the Summary Compensation Table if the employee would be considered a "highly compensated employee" solely because of payments related to or change(s) in value of the employee's qualified pension plan provided that the plan was available to all similarly situated employees on the same basis at the time the employee joined the plan. System banks and associations were required to comply with the rule for compensation reported in the table for the fiscal year ending 2015 and subsequent years, and could implement the rule retroactively for the fiscal year ended 2014. The Association has not applied the rule retroactively for the fiscal year ended 2014.

In addition to base salary, all employees have the ability to earn additional compensation under an incentive plan. The Association incentive plan is designed to motivate employees to complete actions needed to achieve business plan goals during the fiscal year.

The incentive plan includes three components – the primary incentive plan (referred to hereafter as the "General Incentive Plan") that is available for all qualifying staff members; a component available to agribusiness and capital markets loan officers to incent business development activity (referred to hereafter as the "Agribusiness/Capital Markets Plan"); and a component available to country mortgage loan officers to incent business development activity (referred to hereafter as the "Country Mortgage Plan".

The General Incentive Plan is measured annually and is based on one performance cycle from January through December. To participate in the General Incentive Plan an employee must not have terminated employment prior to nor be on probation at the end of the performance cycle, and the employee must have satisfactory performance as measured by their most recent performance appraisal.

The General Incentive Plan is measured utilizing credit quality, delinquency rate, loan volume and return on assets. Under the

plan, points are awarded for meeting various benchmarks such as the percentage of loans that carry a credit quality grade of "Acceptable", the percentage of past due loans to accruing loan volume, the amount of loan volume, and the return on assets ratio. The performance against the established benchmarks translates to a certain number of awarded points. Based upon how many points were achieved for the performance cycle, qualifying staff members are awarded a percentage of their total compensation. The percentage awarded is based upon the total points earned during the performance cycle as well as the employee's salary grade.

Under the General Incentive Plan, the percentage of compensation that could be awarded ranges from 3 percent to 15 percent of the employee's total compensation during the performance cycle. Senior officers do not specifically earn higher awards under the plan by virtue of their position; however, generally speaking, a senior officer would be expected to have a higher salary grade based upon their increased level of responsibility and accountability for Association performance. For 2017, awards under the General Incentive Plan ranged from 4 percent to 12 percent for the performance cycle (January through December). Payment to employees covered under this plan is made as soon as practicable following the performance cycle.

Under the Agribusiness/Capital Markets Plan, loan officers earn points for developing new business by originating loans to new and existing borrowers, as well as by increasing portfolio growth. There are two performance cycles, January through June and July through December, for measuring new business development. There is one performance cycle, January through December, for measuring portfolio growth. Eligible new loans must satisfy established standards, including meeting regulatory requirements for borrower eligibility, receiving a satisfactory loan review grade to show acceptable credit administration standards, and maintaining an "Acceptable" credit classification during the plan year. Loan officers are awarded points based on their performance against a predetermined business development quota and growth benchmarks for their individual loan portfolios. Loan officers are eligible to earn an incentive award of up to 12 percent of their total compensation. For 2017, incentive awards ranged from 0 percent to 4 percent for the first performance cycle and 0 percent to 6 percent for the second performance cycle. If a loan officer failed to achieve a certain percentage of their predetermined quota and failed to meet their portfolio growth benchmarks, no points were awarded and that loan officer

<sup>\*\*</sup> Comprised of group life insurance premiums, automobile compensation, spousal travel, and (in 2016) accumulated annual leave in the amount of \$32,691 paid to one retiring officer.

received no incentive under the plan. The Association's senior officers were not eligible to participate in the Agribusiness/Capital Markets Plan during 2017. Payment to employees covered under this plan is made as soon as practicable following each performance cycle.

Under the Country Mortgage Plan, country mortgage loan officers earn points for developing new business by originating loans to new and existing borrowers. The plan includes loans originated and held in the Association's portfolio and loans originated and sold on the secondary mortgage market. There are two performance cycles, January through June and July through December. Eligible new loans must satisfy established standards. Portfolio loans must meet regulatory requirements for borrower eligibility, receive a satisfactory loan review grade to show acceptable credit administration standards, and maintain an "Acceptable" credit classification during the plan year. Loan officers are awarded points based on their performance against a pre-determined business development quota and are eligible to earn an incentive award of up to 6 percent of their total compensation. For 2017, incentive awards ranged from 0 percent to 6 percent for both performance cycles. If a loan officer failed to achieve a certain percentage of their predetermined quota, no points were awarded and that loan officer received no incentive under the plan. The Association's senior officers were not eligible to participate in the Country Mortgage Plan during 2017. Payment to employees covered under this plan is made as soon as practicable following each performance cycle.

During 2017, under the General Incentive Plan and related components as described above, the CEO earned \$29,815 and senior officers earned \$91,670. Those amounts are presented as a bonus in the table above. Bonuses are shown in the year earned, which may be different than the year of payment.

Senior officers and other Association employees are reimbursed on an actual cost basis for all expenses incurred in the performance of official duties. Such expenses may include transportation, lodging, meals, tips, tolls, parking, registration fees and other expenses associated with travel on official business. Some senior officers and other Association employees are assigned an automobile to be utilized in the performance of Association duties. Personal usage of the assigned automobile is allowed on a limited basis. Any personal usage is considered a benefit to the officer or employee and is included as income to the individual in accordance with IRS regulations. Total benefit to senior officers for the personal usage of Association automobiles during 2017 was \$18,862.

A copy of the expense and incentive plan policies is available to shareholders of the Association upon request. Disclosure of information on the total compensation earned in 2017 by any senior officer, or by any individual included in the total, is available to shareholders upon request.

#### **Retirement and Deferred Compensation Plans**

The Association's compensation programs include retirement and deferred compensation plans designed to provide income following an employee's retirement. Although retirement benefits are paid following an employee's retirement, the benefits are earned while employed. The objective of the Association is to offer benefit plans that are market competitive and aligned with the Association's strategic objectives. The plans are designed to enable the Association to proactively attract, retain, recognize and reward a highly skilled, motivated and diverse staff that supports the Association's mission and that allows the Association to align the human capital needs with the Association's overall strategic plan.

Employees participate in one of two qualified defined benefit retirement plans. Employees hired prior to January 1, 2003 participate in the AgFirst Farm Credit Retirement Plan.

Employees are eligible to retire and begin drawing unreduced pension benefits at age 65 or when years of credited service plus age equal "85." Upon retirement, annual payout is equal to 2 percent of the highest three years average compensation times years of credited service, subject to the Internal Revenue Code limitations. For purposes of determining the payout, "average compensation" is defined as regular salary (i.e., does not include incentive awards compensation). At the election of the retiree, benefits are paid based upon various annuity terms or on a lump sum basis. Benefits under the plan are not subject to an offset for Social Security.

Employees hired on or after January 1, 2003 participate in the AgFirst Farm Credit Cash Balance Retirement Plan. Employees are eligible to retire and begin drawing unreduced pension benefits at age 65 with a minimum of 5 years of credited service or at age 55 with a minimum of 10 years of credited service. Upon retirement, payout is determined using a

percent of eligible compensation formula, subject to the Internal Revenue Code limitation on compensation, and regular interest credits. For purposes of determining the payout, "compensation" is defined as regular salary (i.e., does not include incentive awards compensation). At the election of the retiree, benefits are paid based upon various annuity terms or on a lump sum basis. Benefits under the plan are not subject to an offset for Social Security. The Cash Balance Plan was terminated effective as of December 31, 2016. Beginning on January 1, 2015, for participants in the plan and eligible employees hired on or after November 4, 2014, additional employer contributions are made to the 401(k) Plan equal to 3.00 percent of the participants' eligible compensation.

The present value of pension benefits is the value at a specific date of the expected future benefit payment stream based on actuarial assumptions, chiefly the discount rate. Other assumptions are also used, such as expected retirement age and life expectancy. Changes in the actuarial assumptions can increase or decrease the pension values.

Employees participate in the Farm Credit Benefits Alliance 401(k) Plan, a qualified 401(k) defined contribution plan which has an employer matching contribution determined by the employee's date of hire. Employees hired prior to January 1, 2003 receive a maximum employer matching contribution equal to \$0.50 for each \$1.00 of employee compensation contributed up to 6 percent, subject to the Internal Revenue Code limitation on compensation. Employees hired on or after January 1, 2003 receive a maximum employer matching contribution equal to \$1.00 for each \$1.00 of employee compensation contributed up to 6 percent, subject to the Internal Revenue Code limitation on compensation. Beginning in 2015, contributions include additional amounts related to the discontinuation of the Cash Balance Plan as discussed above.

The CEO, Mr. Bitner, participates in the Farm Credit Benefits Alliance Nonqualified Supplemental 401(k) Plan, a nonqualified deferred compensation plan that allows certain key employees to defer compensation and which restores the benefits limited in the qualified 401(k) plan as a result of restrictions in the Internal Revenue Code. The plan also includes a provision for discretionary contributions to be made by the Association. The Association made a contribution of \$1,100 to this plan for Mr. Bitner during 2017. No other employees participated in this plan during 2017.

Please see Note 9, *Employee Benefit Plans*, for further information on benefit plans.

#### **Directors**

The following chart details the directors serving in 2017, their current term of service and total cash compensation paid:

| ame of Director Current Ter        |           | Total<br>Compensation |        |  |
|------------------------------------|-----------|-----------------------|--------|--|
| Richard Terry, Chairman            | 2017-2020 | \$                    | 13,350 |  |
| Cindy Eade, Vice Chairperson       | 2017-2020 |                       | 10,350 |  |
| Melvin Adams                       | 2015-2018 |                       | 4,750  |  |
| Damon Boutwell                     | 2016-2019 |                       | 10,550 |  |
| James R. Dean, Outside Director    | 2017-2020 |                       | 8,250  |  |
| Desmond Dodd                       | 2016-2019 |                       | 9,600  |  |
| D. Mark Fletcher, Outside Director | 2017-2020 |                       | 6,850  |  |
| Radford Locklin, Jr.               | 2015-2018 |                       | 5,600  |  |
| Glen Strange                       | 2017-2020 |                       | 9,250  |  |
| Michael Thompson                   | 2016-2019 |                       | 9,700  |  |
| R. Douglas Walker                  | 2015-2018 |                       | 6,050  |  |
| Total                              |           | \$                    | 94,300 |  |

The following represents certain information regarding the directors of the Association, including their principal occupation and employment for the past five years.

Richard Terry, Chairman, owns and operates a row crop farm in Madison County. This has been his principal occupation for the past five years. He serves on the board for Madison County Farm Bureau (farm and supply cooperative). He previously served on the board of the Florida and Madison County Tobacco Warehouse (tobacco warehouse) and on the board of Farmers' Co-op, Inc. (agricultural services). He currently serves as the Chairman of the Board of Farm Credit of Northwest Florida and as Chairman of the Executive Committee and the Steering Committee.

Cindy S. Eade, Vice Chairperson, has been in dairy production for over twenty years and this has been her principal occupation for the past five years. She is the co-owner and manager of Cindale Farms LLC and Southern Craft Creamery. She is past Chairperson of the Board of Directors of the Jackson County Chamber of Commerce (business and community development) and is an appointed member/secretary of the Florida Soil and Water Conservation Council.

Melvin T. Adams owns and operates a cattle operation and row crop farm in Jackson and Holmes Counties. This has been his principal occupation for the past five years. He is co-owner of 2WO A Farms LLC and Gum Creek Cattle LLC, both farming and ranching entities. Mr. Adams is on the board of directors of SOWEGA Gin (a cotton gin).

**Damon Boutwell** is the General Manager of the Pace Water System, Inc. This has been his principal occupation for the past five years. He also served as Assistant Manager and previously as Utility Engineer from 2002 until 2012. Mr. Boutwell owns and manages a 225 acre farm consisting of a 50 brood cow cattle operation on 95 acres of pastureland, 90 acres of timberland and wildlife habitat, and 40 acres of hay that is leased to a hay contractor/producer. He is also the Managing Partner for some 600 acres of family trust lands. He currently serves on the advisory board of United Bank and the Executive Board of Leadership Santa Rosa Alumni.

James R. Dean is an outside director and has over twenty years of experience in the field of Economic and Community Development. He is currently the City Manager of Marianna, Florida. This has been his principal occupation for the past five years. He has served in that position since March of 2008. From July 2006 until March 2008 he was a District Director with the USDA, Rural Development. He is a former employee of Farm Credit of Northwest Florida. Mr. Dean serves as the Chairman of the Compensation Committee.

**Desmond Dodd** is a builder of custom homes and is the owner/operator of Dodd Design & Construction, Inc. in Tallahassee, Florida. He is also the President of Dodd Carpentry Services, Inc. This has been his principal occupation for the past five years. His current farm operation consists of an 80 brood cow beef cattle herd. Mr. Dodd is on the board of the Gadsden County Cattlemen's Association.

**D. Mark Fletcher, CPA**, is an outside director. Mr. Fletcher has twenty-eight years of experience in public accounting and is the senior partner in charge of the Tallahassee, Florida office of Lanigan and Associates, P.C. This has been his principal occupation for the past five years. Mr. Fletcher serves as

Chairman of the Audit Committee and is designated as the Association's financial expert.

Radford Locklin, Jr. is a retired school teacher and principal. This has been his principal occupation for the past five years. He was employed by the Santa Rosa School District for thirty-four years and served as Principal of Central High School for twenty years. Mr. Locklin owns and manages a 204 acre farm consisting of 40 acres of cropland that is leased to a local farmer, 160 acres of longleaf and loblolly pine timberland and a garden area. He currently serves on the board of Escambia River Electric Cooperative (rural electric cooperative) where he is the Secretary/Treasurer of the board of directors.

Glen Strange is the owner/operator of Panhandle Growers, Inc., a 300 acre nursery operation serving landscapers and developers in southeastern states. This has been his principal occupation for the past five years. He is also the owner of Coldwater Transport, a trucking company that delivers the landscaping materials for Panhandle Growers, Inc., and North Florida Palms, a 100 acre family-operated palm tree farm. Mr. Strange is a member of the Florida Nursery, Growers and Landscape Association and the Alabama Nursery and Landscape Association.

Michael Thompson currently serves as President of Thompson Brothers Angus Farm, Inc. This has been his principal occupation for the past five years. His farm operation includes 2,000 acres where he produces registered Angus cattle breeding stock as well as 1,000 acres of hay and 900 acres of soybeans, peanuts and oats. He also provides custom farm-made feed to the livestock industry. Mr. Thompson serves as a director on the board of the Jackson County Farm Bureau.

R. Douglas Walker has been a self-employed farmer and President of Walker and Sons Farms, Inc. for over thirty years. This has been his principal occupation for the past five years. His farm operation consists of two family-owned dairy farms. The operation also produces corn, oats and rye grass for feed. He also has a pecan grove and a beef cattle cow/calf operation. Mr. Walker is also the manager for Walker and Sons Land Company and serves on the board of Southeast Milk, Inc. (dairy cooperative). Mr. Walker is Chairman of the Loan Committee.

Subject to approval by the board, the Association currently may allow directors \$500 honoraria for attendance at meetings or special assignments with the exception of the Chairman, who is allowed \$600 honoraria for board meetings. Total compensation paid to directors as a group was \$94,300 for 2017. Directors are paid \$100 for an Association related telephone conference. No director received more than \$5,000 in non-cash compensation during the year.

The following charts detail the number of meetings, compensation for board meetings, other activities and additional compensation paid for other activities (if applicable) for each director:

|                                    | Regular Board Meeting |      |          |  |
|------------------------------------|-----------------------|------|----------|--|
| DIRECTOR                           | Days Served           | Comp | ensation |  |
| Richard Terry, Chairman            | 10                    | \$   | 6,000    |  |
| Cindy Eade, Vice Chairperson       | 9                     |      | 4,500    |  |
| Melvin Adams                       | 8                     |      | 4,000    |  |
| Damon Boutwell                     | 10                    |      | 5,000    |  |
| James R. Dean, Outside Director    | 8                     |      | 4,000    |  |
| Desmond Dodd                       | 10                    |      | 5,000    |  |
| D. Mark Fletcher, Outside Director | 9                     |      | 4,500    |  |
| Radford Locklin, Jr.               | 9                     |      | 4,500    |  |
| Glen Strange                       | 10                    |      | 5,000    |  |
| Michael Thompson                   | 10                    |      | 5,000    |  |
| R. Douglas Walker                  | 9                     |      | 4,500    |  |
| Total                              | ļ                     | \$   | 52,000   |  |

|                                    | Other Official Activities |              |  |  |

| Michael Thompson                   | Loan                      |
| R. Douglas Walker                  | Loan, Executive, Steering |

Directors are reimbursed on an actual cost basis for all expenses incurred in the performance of official duties. Such expenses may include transportation, lodging, meals, tips, tolls, parking of cars, laundry, registration fees, and other expenses associated with travel on official business. A copy of the expense policy is available to shareholders of the Association upon request.

The aggregate amount of reimbursement for travel, subsistence and other related expenses for all directors as a group was \$43,851 for 2017, \$49,569 for 2016, and \$58,360 for 2015.

#### **Transactions with Senior Officers and Directors**

The reporting entity's policies on loans to and transactions with its officers and elected directors to be disclosed in this section are incorporated herein by reference to Note 10, *Related Party Transactions*, of the Consolidated Financial Statements included in this Annual Report. There have been no transactions between the Association and senior officers or directors which require reporting per FCA regulations except as disclosed in Note 10.

#### **Involvement in Certain Legal Proceedings**

There were no matters which came to the attention of management or the board of directors regarding involvement of current directors or senior officers in specified legal proceedings which should be disclosed in this section. No directors or senior officers have been involved in any legal proceedings during the last five years which require reporting per FCA regulations.

#### Relationship with Independent Auditors

There were no changes in or material disagreements with our independent auditors on any matter of accounting principles or financial statement disclosure during this period.

Aggregate fees incurred by the Association for services rendered by its independent auditors for the year ended December 31, 2017 were as follows:

|                            | <br>2017     |
|----------------------------|--------------|
| Independent Auditors       |              |

Audit fees were for the annual audit of the consolidated financial statements.

#### **Consolidated Financial Statements**

The consolidated financial statements, together with the report thereon of PricewaterhouseCoopers LLP dated March 13, 2018 and the report of management, which appear in this Annual Report, are incorporated herein by reference.

Copies of the Association's Annual and Quarterly reports are available upon request free of charge by calling 1-850-526-4910 or writing John Mottice, Chief Financial Officer, Farm Credit of Northwest Florida, P.O. Box 7000, Marianna, Florida 32447, or accessing the website, *www.farmcredit-fl.com*. The Association prepares an electronic version of the Annual Report which is available on the Association's website within 75 days after the end of the fiscal year and distributes the Annual Report to shareholders within 90 days after the end of the fiscal year. The Association prepares an electronic version of the Quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

#### **Borrower Information Regulations**

Since 1972, Farm Credit Administration (FCA) regulations have required that borrower information be held in strict confidence by Farm Credit System (FCS) institutions, their directors, officers and employees. These regulations provide Farm Credit Institutions clear guidelines for protecting their borrowers' nonpublic personal information.

On November 10, 1999, the FCA Board adopted a policy that requires FCS Institutions to formally inform new borrowers at loan closing of the FCA regulations on releasing borrower information and to address this information in the Annual Report. The implementation of these measures ensures that new and existing borrowers are aware of the privacy protections afforded them through FCA regulations and Farm Credit System institution efforts.

#### Credit and Services to Young, Beginning, and Small Farmers and Ranchers and Producers or Harvesters of Aquatic Products

Information to be disclosed in this section is incorporated herein by reference to the similarly named section in the Management's Discussion and Analysis of Financial Condition and Results of Operations section included in this Annual Report to shareholders.

#### **Shareholder Investment**

Shareholder investment in the Association may be materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank (AgFirst or the Bank). Copies of the Bank's Annual and Quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2764, or writing Matthew Miller, AgFirst Farm Credit Bank, P. O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained by going to AgFirst's website at www.agfirst.com. The Bank prepares an electronic version of the Annual Report, which is available on the website, within 75 days after the end of the fiscal year and distributes the Annual Report to shareholders within 90 days after the end of the fiscal year. The Bank prepares an electronic version of the Quarterly report within 40 days after the end of each fiscal quarter, except that no report needs to be prepared for the fiscal quarter that coincides with the end of the fiscal year of the Bank.

## Report of the Audit Committee

The Audit Committee of the Board of Directors (Committee) is comprised of the directors named below. None of the directors who serve on the Committee is an employee of Farm Credit of Northwest Florida, ACA (Association) and in the opinion of the Board of Directors, each is free of any relationship with the Association or management that would interfere with the director's independent judgment on the Committee.

The Committee has adopted a written charter that has been approved by the Board of Directors. The Committee has reviewed and discussed the Association's audited financial statements with management, which has primary responsibility for the financial statements.

PricewaterhouseCoopers LLP (PwC), the Association's independent auditors for 2017, is responsible for expressing an opinion on the conformity of the Association's audited financial statements with accounting principles generally accepted in the United States of America. The Committee has discussed with PwC the matters that are required to be discussed by Statement on Auditing Standards No. 114 (The Auditor's Communication With Those Charged With Governance).

The Committee discussed with PwC its independence from the Association. The Committee also reviewed the non-audit services provided by PwC and concluded that these services were not incompatible with maintaining PwC's independence.

Based on the considerations referred to above, the Committee recommended to the Board of Directors that the audited financial statements be included in the Association's Annual Report for 2017. The foregoing report is provided by the following independent directors, who constitute the Committee:

D. Mark Fletcher, CPA Chairman of the Audit Committee

**Members of Audit Committee** 

Cindy S. Eade Damon Boutwell

#### **Report of Independent Auditors**

To the Board of Directors and Management of Farm Credit of Northwest Florida, ACA

We have audited the accompanying consolidated financial statements of Farm Credit of Northwest Florida, ACA and its subsidiaries (the "Association"), which comprise the consolidated balance sheets as of December 31, 2017, 2016 and 2015, and the related consolidated statements of income, comprehensive income, changes in members' equity and cash flows for the years then ended.

#### Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Association's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Farm Credit of Northwest Florida, ACA and its subsidiaries as of December 31, 2017, 2016 and 2015, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

PricewaterhouseCoopers LLP Certified Public Accountants Miami, Florida

The accompanying notes are an integral part of these financial statements.

## Notes to the Consolidated Financial Statements

(dollars in thousands, except as noted)

#### Note 1 — Organization and Operations

A. Organization: Farm Credit of Northwest Florida, ACA (Association) is a member-owned cooperative that provides credit and credit-related services to qualified borrowers in the counties of Bay, Calhoun, Escambia, Franklin, Gadsden, Gulf, Holmes, Jackson, Jefferson, Leon, Liberty, Madison, Okaloosa, Santa Rosa, Taylor, Wakulla, Walton, and Washington in the state of Florida.

The Association is a lending institution in the Farm Credit System (System), a nationwide network of cooperatively owned banks and associations. It was established by Acts of Congress and is subject to the provisions of the Farm Credit Act of 1971, as amended (Farm Credit Act). The System specializes in providing financing and related services to qualified borrowers for agricultural and rural purposes.

The nation is served by three Farm Credit Banks (FCBs) and one Agricultural Credit Bank (ACB), (collectively, the System Banks) each of which has specific lending authorities within its chartered territory. The ACB also has additional specific nationwide lending authorities.

Each System Bank serves one or more Agricultural Credit Associations (ACAs) that originate and service short-, intermediate- and long-term loans, Production Credit Associations (PCAs) that originate and service short- and intermediate-term loans, and/or Federal Land Credit Associations (FLCAs) that originate and service long-term real estate mortgage loans. These associations borrow a majority of the funds for their lending activities from their related bank. System Banks are also responsible for supervising the activities of associations within their districts. AgFirst (Bank) and its related associations (Associations or District Associations) are collectively referred to as the AgFirst District. The District Associations jointly own substantially all of AgFirst's voting stock. As of year end, the District consisted of the Bank and nineteen District Associations. All nineteen were structured as ACA holding companies, with PCA and FLCA subsidiaries. FLCAs are tax-exempt while ACAs and PCAs are taxable.

The Farm Credit Administration (FCA) is delegated authority by Congress to regulate the System banks and associations. The FCA examines the activities of the associations and certain actions by the associations are subject to the prior approval of the FCA and the supervising bank.

The Farm Credit Act also established the Farm Credit System Insurance Corporation (Insurance Corporation) to administer the Farm Credit Insurance Fund (Insurance Fund). The Insurance Fund is required to be used (1) to ensure the timely payment of principal and interest on System wide debt obligations (Insured Debt), (2) to ensure the retirement of protected borrower capital at par or stated

value, and (3) for other specified purposes. The Insurance Fund is also available for discretionary uses by the Insurance Corporation to provide assistance to certain troubled System institutions and to cover the operating expenses of the Insurance Corporation. Each System bank has been required to pay premiums, which may be passed on to the Association, into the Insurance Fund, based on its annual average adjusted outstanding Insured Debt until the assets in the Insurance Fund reach the "secure base amount." The secure base amount is defined in the Farm Credit Act as 2.0 percent of the aggregate insured obligations (adjusted to reflect the reduced risk on loans or investments guaranteed by federal or state governments) or such other percentage of the aggregate obligations as the Insurance Corporation at its sole discretion determines to be actuarially sound. When the amount in the Insurance Fund exceeds the secure base amount, the Insurance Corporation is required to reduce premiums and may return excess funds above the secure base amount to System institutions. However, it must still ensure that reduced premiums are sufficient to maintain the level of the Insurance Fund at the secure base amount.

B. **Operations:** The Farm Credit Act sets forth the types of authorized lending activity and financial services that can be offered by the Association, and the persons eligible to borrow.

The Associations borrow from the Bank and in turn may originate and service short- and intermediate-term loans to their members, as well as long-term real estate mortgage loans.

The Bank primarily lends to the District Associations in the form of a line of credit to fund the Associations' earning assets. These lines of credit (or Direct Notes) are collateralized by a pledge of substantially all of each Association's assets. The terms of the Direct Notes are governed by a General Financing Agreement (GFA) between the Bank and Association. Each advance is structured such that the principal cash flow, repricing characteristics, and underlying index (if any) of the advance match those of the assets being funded. By match-funding the Association loans, the Associations' exposure to interest rate risk is minimized.

In addition to providing funding for earning assets, the Bank provides District Associations with banking and support services such as accounting, human resources, information systems, and marketing. The costs of these support services are included in the cost of the Direct Note, or in some cases billed directly to certain Associations that use a specific service.

The Association is authorized to provide, either directly or in participation with other lenders, credit, credit commitments, and related services to eligible borrowers. Eligible borrowers include farmers, ranchers, producers or harvesters of aquatic products, rural residents, and farm-related businesses.

The Association may sell to any System borrowing member, on an optional basis, credit or term life insurance appropriate to protect the loan commitment in the event of death of the debtor(s). The sale of other insurance necessary to protect a member's farm or aquatic unit is permitted, but limited to hail and multi-peril crop insurance, and insurance necessary to protect the facilities and equipment of aquatic borrowers.

#### Note 2 — Summary of Significant Accounting Policies

The accounting and reporting policies of the Association conform with accounting principles generally accepted in the United States of America (GAAP) and prevailing practices within the banking industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Significant estimates are discussed in these footnotes, as applicable. Actual results may differ from these estimates.

The accompanying consolidated financial statements include the accounts of the ACA, PCA and FLCA.

Certain amounts in the prior year financial statements have been reclassified to conform to the current period presentation. Such reclassifications had no effect on net income or total members' equity of prior years.

- A. Cash: Cash represents cash on hand and on deposit at banks
- B. Loans and Allowance for Loan Losses: The Association is authorized to make long-term real estate loans with maturities of 5 to 40 years and certain short- and intermediate-term loans for agricultural production or operating purposes with maturities of not more than 10 years.

Loans are carried at their principal amount outstanding adjusted for charge-offs, premiums, discounts, deferred loan fees or costs, and derivative instruments and hedging valuation adjustments, if any. Interest on loans is accrued and credited to interest income based upon the daily principal amount outstanding. The difference in the total investment in a loan and its principal amount may be deferred as part of the carrying amount of the loan and the net difference amortized over the life of the related loan as an adjustment to interest income using the effective interest method.

Impaired loans are loans for which it is probable that not all principal and interest will be collected according to the contractual terms of the loan. Impaired loans include nonaccrual loans, restructured loans, and could include loans past due 90 days or more and still accruing interest. A loan is considered contractually past due when any principal repayment or interest payment required by the loan instrument is not received on or before the due date. A loan shall remain contractually past due until it is formally restructured or until the entire amount past due, including

principal, accrued interest, and penalty interest incurred as the result of past due status, is collected or otherwise discharged in full.

Loans are generally classified as nonaccrual when principal or interest is delinquent for 90 days (unless adequately collateralized and in the process of collection) or circumstances indicate that collection of principal and/or interest is in doubt. When a loan is placed in nonaccrual status, accrued interest deemed uncollectible is reversed (if accrued in the current year) or charged against the allowance for loan losses (if accrued in the prior year).

When loans are in nonaccrual status, the interest portion of payments received in cash is recognized as interest income if collection of the recorded investment in the loan is fully expected and the loan does not have a remaining unrecovered prior charge-off associated with it. Otherwise, loan payments are applied against the recorded investment in the loan. Nonaccrual loans may be returned to accrual status when principal and interest are current, prior charge-offs have been recovered, the ability of the borrower to fulfill the contractual repayment terms is fully expected and the loan is not classified "doubtful" or "loss."

Loans are charged off, wholly or partially, as appropriate, at the time they are determined to be uncollectible.

In cases where a borrower experiences financial difficulties and the Association makes certain monetary concessions to the borrower through modifications to the contractual terms of the loan, the loan is classified as a restructured loan. A restructured loan constitutes a troubled debt restructuring (TDR) if for economic or legal reasons related to the debtor's financial difficulties the Association grants a concession to the debtor that it would not otherwise consider. If the borrower's ability to meet the revised payment schedule is uncertain, the loan is classified as a nonaccrual loan.

The allowance for loan losses is maintained at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Association has been identified. The allowance for loan losses is a valuation account used to reasonably estimate loan losses as of the financial statement date. Determining the appropriate allowance for loan losses balance involves significant judgment about when a loss has been incurred and the amount of that loss.

The Association considers the following factors, among others, when determining the allowance for loan losses:

- Changes in credit risk classifications
- Changes in collateral values
- Changes in risk concentrations
- Changes in weather-related conditions
- Changes in economic conditions

A specific allowance may be established for impaired loans under Financial Accounting Standards Board (FASB) guidance on accounting by creditors for impairment of a loan. Impairment of these loans is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as practically expedient, at the loan's observable market price or fair value of the collateral if the loan is collateral dependent.

A general allowance may also be established under FASB guidance on accounting for contingencies, to reflect estimated probable credit losses inherent in the remainder of the loan portfolio which excludes impaired loans considered under the specific allowance discussed above. A general allowance can be evaluated on a pool basis for those loans with similar characteristics. The level of the general allowance may be based on management's best estimate of the likelihood of default adjusted for other relevant factors reflecting the current environment.

The credit risk rating methodology is a key component of the Association's allowance for loan losses evaluation, and is generally incorporated into the institution's loan underwriting standards and internal lending limit. The Association uses a two-dimensional loan rating model based on internally generated combined system risk rating guidance that incorporates a 14-point risk rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default over a period of time. Probability of default is the probability that a borrower will experience a default within 12 months from the date of the determination of the risk rating. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower is past due more than 90 days. The loss given default is management's estimate as to the anticipated economic loss on a specific loan assuming default has occurred or is expected to occur within the next 12 months.

Each of the 14 categories carries a distinct percentage of default probability. The 14-point risk rating scale provides for granularity of the probability of default, especially in the acceptable ratings. There are nine acceptable categories that range from a borrower of the highest quality to a borrower of minimally acceptable quality. The probability of default between "1" and "9" is very narrow and would reflect almost no default to a minimal default percentage. The probability of default grows more rapidly as a loan moves from a "9" to other assets especially mentioned and grows significantly as a loan moves to a substandard (viable) level. A substandard (non-viable) rating indicates that the probability of default is almost certain.

- C. Loans Held for Sale: Loans are classified as held for sale when there is intent to sell the loans within a reasonable period of time. Loans intended for sale are carried at the lower of cost or fair value.
- D. Other Property Owned: Other property owned, consisting of real estate, personal property, and other assets acquired through a collection action, is recorded upon acquisition at fair value less estimated selling costs. Any initial reduction in the carrying amount of a loan to the fair value of the collateral received is charged to the allowance for loan losses. Revised estimates to the fair value less cost to sell are reported as adjustments to the carrying amount of the

asset, provided that such adjusted value is not in excess of the carrying amount at acquisition. Income, expenses, and carrying value adjustments related to other property owned are included in (Gains) Losses on Other Property Owned, Net in the Consolidated Statements of Comprehensive Income.

E. Premises and Equipment: Land is carried at cost.

Premises and equipment are carried at cost less accumulated depreciation. Depreciation is provided on the straight-line method over the estimated useful lives of the assets. Gains and losses on dispositions are reflected in current earnings. Maintenance and repairs are charged to expense and improvements are capitalized. Premises and equipment are evaluated for impairment whenever events or circumstances indicate that the carrying value of the asset may not be recoverable.

From time to time, assets classified as premises and equipment are transferred to held for sale for various reasons. These assets are carried in Other Assets at the lower of the recorded investment in the asset or fair value less estimated cost to sell based upon the property's appraised value at the date of transfer. Any write-downs of property held for sale are recorded as other non-interest expense.

F. Investments: The Association may hold investments as described below.

#### Other Investments

As discussed in Note 8, certain investments, consisting primarily of mutual funds, are held in trust and investment accounts and are reported at fair value. Holding period gains and losses are included within other noninterest income on the Consolidated Statements of Comprehensive Income and the balance of these investments, totaling \$1, is included in Other Assets on the accompanying Consolidated Balance Sheets as of December 31, 2017.

#### Investment in Other Farm Credit Institutions

The Association is required to maintain ownership in the Bank in the form of Class B and Class C stock, as presented on the Consolidated Balance Sheets as Investments in Other Farm Credit Institutions. Accounting for this investment is on the cost plus allocated equities basis.

- G. Voluntary Advance Conditional Payments: The Association is authorized under the Farm Credit Act to accept advance payments from borrowers. To the extent the borrower's access to such advance payments is restricted, the advanced conditional payments are netted against the borrower's related loan balance. Amounts in excess of the related loan balance and amounts to which the borrower has unrestricted access are presented as Other Liabilities in the accompanying Consolidated Balance Sheets. Advanced conditional payments are not insured. Interest is generally paid by the Association on such accounts.
- H. Employee Benefit Plans: The Association participates in District and multi-District sponsored benefit plans. These plans may include a defined benefit final average pay retirement, defined benefit cash balance retirement, defined benefit other postretirement benefits, and defined contribution plans.

#### **Defined Contribution Plans**

Substantially all employees are eligible to participate in the defined contribution Farm Credit Benefit Alliance (FCBA) 401(k) Plan, subsequently referred to as the 401(k) Plan, which qualifies as a 401(k) plan as defined by the Internal Revenue Code. Employee deferrals are not to exceed the maximum deferral as determined and adjusted by the Internal Revenue Service. Company contributions to the 401(k) Plan are expensed as funded.

Additional information for the above may be found in Note 9 and the Notes to the Combined Financial Statements of AgFirst Farm Credit Bank and District Associations' Annual Report.

#### Multi-Employer Defined Benefit Plans

Substantially all employees hired before January 1, 2003 may participate in the AgFirst Farm Credit Retirement Plan (Plan), which is a defined benefit plan and considered multiemployer under FASB accounting guidance. The Plan is noncontributory and includes eligible Association and District employees. The "Projected Unit Credit" actuarial method is used for financial reporting purposes.

In addition to pension benefits, the Association provides certain health care and life insurance benefits for retired employees (other postretirement benefits) through a multi-District sponsored retiree healthcare plan. Substantially all employees are eligible for those benefits when they reach early retirement age while working for the Association. Authoritative accounting guidance requires the accrual of the expected cost of providing these benefits to an employee, their beneficiaries and covered dependents during the years the employee renders service necessary to become eligible for benefits.

Since the foregoing plans are multi-employer, the Association does not apply the provisions of FASB guidance on employers' accounting for defined benefit pension and other postretirement plans in its stand-alone financial statements. Rather, the effects of this guidance are reflected in the Combined Financial Statements of AgFirst Farm Credit Bank and District Associations for the pension plan and in the Annual Information Statement of the Farm Credit System for the other postretirement benefits plan.

Additional information for the above may be found in Note 9 and in the Notes to the Combined Financial Statements of AgFirst Farm Credit Bank and District Associations' Annual Report and the Notes to the Annual Information Statement of the Farm Credit System.

#### Single Employer Defined Benefit Plans

The Association also offers a FCBA supplemental 401(k) plan for certain key employees. This plan is nonqualified; therefore, the associated liability is included in the Association's Consolidated Balance Sheets in Other Liabilities.

The foregoing defined benefit plan is considered single employer, therefore the Association applies the provisions of FASB guidance on employers' accounting for defined benefit pension and other postretirement plans in its standalone financial statements. See Note 9 for additional information.

I. Income Taxes: The Association evaluates tax positions taken in previous and current years according to FASB guidance. A tax position can result in a permanent reduction of income taxes payable, a deferral of income taxes otherwise currently payable to future years, or a change in the expected realizability of deferred tax assets. The term tax position also encompasses, but is not limited to, an entity's status, including its status as a pass-through entity or tax-exempt entity.

The Association is generally subject to Federal and certain other income taxes. As previously described, the ACA holding company has two wholly-owned subsidiaries, a PCA and a FLCA. The FLCA subsidiary is exempt from federal and state income taxes as provided in the Farm Credit Act. The ACA holding company and the PCA subsidiary are subject to federal, state and certain other income taxes.

The Association is eligible to operate as a cooperative that qualifies for tax treatment under Subchapter T of the Internal Revenue Code. Accordingly, under specified conditions, the Association can exclude from taxable income amounts distributed as qualified patronage refunds in the form of cash, stock or allocated surplus. Provisions for income taxes are made only on those taxable earnings that will not be distributed as qualified patronage refunds. The Association distributes patronage on the basis of book income

The Association accounts for income taxes under the asset and liability method, recognizing deferred tax assets and liabilities for the expected future tax consequences of the temporary differences between the carrying amounts and tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled.

The Association records a valuation allowance at the balance sheet dates against that portion of the Association's deferred tax assets that, based on management's best estimates of future events and circumstances, more likely than not (a likelihood of more than 50 percent) will not be realized. The consideration of valuation allowances involves various estimates and assumptions as to future taxable earnings, including the effects of the expected patronage program, which reduces taxable earnings.

- J. Due from AgFirst Farm Credit Bank: The Association records patronage refunds from the Bank and certain District Associations on an accrual basis.
- K. Valuation Methodologies: FASB guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability. This guidance also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. It prescribes three levels of inputs that may be used to measure fair value.

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability.

Level 3 inputs to the valuation methodology are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than a third-party valuation or internal model pricing.

The Association may use the Bank, internal resources or third parties to obtain fair value prices. Quoted market prices are generally used when estimating fair values of any assets or liabilities for which observable, active markets exist

A number of methodologies may be employed to value items for which an observable active market does not exist. Examples of these items include: impaired loans, other property owned, and certain derivatives, investment securities and other financial instruments. Inputs to these valuations can involve estimates and assumptions that require a substantial degree of judgment. Some of the assumptions used include, among others, discount rates, rates of return on assets, repayment rates, cash flows, default rates, costs of servicing, and liquidation values. The use of different assumptions could produce significantly different asset or liability values, which could have material positive or negative effects on results of operations.

Please see further discussion in Note 8.

L. Off-Balance-Sheet Credit Exposures: The credit risk associated with commitments to extend credit and letters of credit is essentially the same as that involved with extending loans to customers and is subject to normal credit policies. Collateral may be obtained based on management's assessment of the customer's creditworthiness.

Commitments to extend credit are agreements to lend to customers, generally having fixed expiration dates or other termination clauses that may require payment of a fee.

Letters of credit are commitments issued to guarantee the performance of a customer to a third party. These letters of credit are issued to facilitate commerce and typically result in the commitment being funded when the underlying transaction is consummated between the customer and third party.

M. Revenue Recognition: The largest source of revenue for the Association is interest income. Interest income is recognized on an accrual basis driven by nondiscretionary formulas based on written contracts, such as loan agreements or securities contracts. Credit-related fees, including letter of credit fees, finance charges and other fees are recognized in non-interest income when earned. Other types of non-interest revenues, such as service charges, professional services and broker fees, are accrued and recognized into income as services are provided and the amount of fees earned is reasonably determinable.

N. Accounting Standards Updates (ASUs): In February 2018, the FASB issued ASU 2018-02 Income Statement— Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. The guidance allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. The amendments eliminate the stranded tax effects resulting from the Tax Cuts and Jobs Act and are intended to improve the usefulness of information reported to financial statement users. However, because the amendments only relate to the reclassification of the income tax effects of the Tax Cuts and Jobs Act, the underlying guidance that requires that the effect of a change in tax laws or rates be included in income from continuing operations is not affected. The Update also requires certain disclosures about stranded tax effects. The guidance is effective for all entities for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted.

In March 2017, the FASB issued ASU 2017-07
Compensation—Retirement Benefits (Topic 715):
Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost related to the income statement presentation of the components of net periodic benefit cost for an entity's sponsored defined benefit pension and other postretirement plans. The amendments will be effective for the Association for interim and annual periods beginning after December 15, 2017 for public business entities. Early adoption is permitted. The Association does not expect these amendments to have a material effect on its financial statements.

In February 2017, the FASB issued ASU 2017-05 Other Income—Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets. The Update clarifies whether certain transactions are within the scope of the guidance on derecognition and the accounting for partial sales of nonfinancial assets, and defines the term in substance nonfinancial asset. The amendments conform the derecognition guidance on nonfinancial assets with the model for transactions in the new revenue standard. The amendments will be effective for reporting periods beginning after December 15, 2017 for public business entities. The Association does not expect these amendments to have a material effect on its financial statements.

In October 2016, the FASB issued ASU 2016-16 Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory. This Update requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. For public business entities, the amendments are effective, on a modified retrospective basis, for annual reporting periods

beginning after December 15, 2017, including interim reporting periods within those annual reporting periods. The Association does not expect these amendments to have a material effect on its financial statements.

In August 2016, the FASB issued ASU 2016-15 Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force). This Update eliminates diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The Update addresses eight specific cash flow issues with the objective of reducing existing diversity in practice. The amendments are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. An entity that elects early adoption must adopt all of the amendments in the same period. The amendments are to be applied using a retrospective transition method to each period presented. The Association elected retrospective early adoption of this guidance. The criteria of the standard were not significantly different from the Association's policy in place at adoption. Application of the guidance had no impact on the Association's Statements of Cash Flows.

In June 2016, the FASB issued ASU 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The Update improves financial reporting by requiring timelier recording of credit losses on financial instruments. It requires an organization to measure all expected credit losses for financial assets held at the reporting date. Financial institutions and other organizations will use forwardlooking information to better estimate their credit losses. Additionally, the ASU amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. For public companies that are not SEC filers, it will take effect for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. Early application will be permitted for all organizations for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Association is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.

In February 2016, the FASB issued ASU 2016-02 Leases (Topic 842). This Update requires organizations that lease assets to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. Leases will be classified as either finance leases or operating leases. This distinction will be relevant for the pattern of expense recognition in the income statement. The amendments will be effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Early adoption is permitted. The Association is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.

In January 2016, the FASB issued ASU 2016-01 Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The Update is intended to improve the recognition and measurement of financial instruments. The new guidance

makes targeted improvements to existing GAAP. The ASU will be effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years for public business entities. The Association does not expect these amendments to have a material effect on its financial statements.

In May 2014, the FASB issued ASU 2014-09 Revenue from Contracts with Customers (Topic 606). This guidance changes the recognition of revenue from contracts with customers. The core principle of the new guidance is that an entity should recognize revenue to reflect the transfer of goods and services to customers in an amount equal to the consideration the entity receives or expects to receive. This guidance also includes expanded disclosure requirements that result in an entity providing users of financial statements with comprehensive information about the nature, amount, timing, and uncertainty of revenue and cash flows arising from the entity's contracts with customers. Based on input received from stakeholders, the FASB has issued several additional Updates that generally provide clarifying guidance where there was the potential for diversity in practice, or address the cost and complexity of applying Topic 606. The guidance and all related updates will be effective for reporting periods beginning after December 15, 2017 for public business entities. The amendments are to be applied retrospectively. The Association has identified ancillary revenues that will be affected by this Update. However, because financial instruments are not within the scope of the guidance, it is expected that adoption will not have a material impact on the Association's financial condition or results of operations. The Association expects to adopt the guidance in first quarter 2018 using the modified retrospective method and that adoption will result in additional disclosures.

#### Note 3 — Loans and Allowance for Loan Losses

For a description of the Association's accounting for loans, including impaired loans, and the allowance for loan losses, see Note 2 subsection B above.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation which exists in outstanding loans. The Association manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Association sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the board of directors.

The credit risk management process begins with an analysis of the obligor's credit history, repayment capacity and financial position. Repayment capacity focuses on the obligor's ability to repay the obligation based on cash flows from operations or other sources of income, including non-farm income. Real estate mortgage loans must be secured by first liens on the real estate collateral. As required by FCA regulations, each institution that makes loans on a secured basis must have collateral evaluation policies and procedures.

The credit risk rating process for loans uses a two-dimensional structure, incorporating a 14-point probability of default scale (see further discussion in Note 2 subsection B above) and a

separate scale addressing estimated percentage loss in the event of default. The loan rating structure incorporates borrower risk and transaction risk. Borrower risk is the risk of loss driven by factors intrinsic to the borrower. The transaction risk or facility risk is related to the structure of a credit (tenor, terms, and collateral).

The Association's loan portfolio, which includes purchased interests in loans, has been segmented by the following loan types as defined by the FCA:

- Real estate mortgage loans loans made to full-time or part-time farmers secured by first lien real estate mortgages with maturities from five to thirty years. These loans may be made only in amounts up to 85 percent of the appraised value of the property taken as security or up to 97 percent of the appraised value if guaranteed by a federal, state, or other governmental agency. The actual percentage of loanto-appraised value when loans are made is generally lower than the statutory required percentage.
- Production and intermediate-term loans loans to full-time or part-time farmers that are not real estate mortgage loans. These loans fund eligible financing needs including operating inputs (such as labor, feed, fertilizer, and repairs), livestock, living expenses, income taxes, machinery or equipment, farm buildings, and other business-related expenses. Production loans may be made on a secured or unsecured basis and are most often made for a period of time that matches the borrower's normal production and marketing cycle, which is typically one year or less. Intermediate-term loans are made for a specific term, generally greater than one year and less than or equal to ten years.
- Loans to cooperatives loans for any cooperative purpose other than for communication, power, and water and waste disposal.
- Processing and marketing loans loans for operations to process or market the products produced by a farmer, rancher, or producer or harvester of aquatic products, or by a cooperative.

- Farm-related business loans loans to eligible borrowers that furnish certain farm-related business services to farmers or ranchers that are directly related to their agricultural production.
- Rural residential real estate loans loans made to individuals, who are not farmers, to purchase a single-family dwelling that will be the primary residence in open country, which may include a town or village that has a population of not more than 2,500 persons. In addition, the loan may be to remodel, improve, or repair a rural home, or to refinance existing debt. These loans are generally secured by a first lien on the property.
- Communication loans loans primarily to finance rural communication providers.
- Power loans loans primarily to finance electric generation, transmission and distribution systems serving rural areas.
- Water and waste disposal loans loans primarily to finance water and waste disposal systems serving rural areas.
- International loans primarily loans or credit enhancements to other banks to support the export of U.S. agricultural commodities or supplies. The federal government guarantees a substantial portion of these loans.
- Lease receivables the net investment for all finance leases such as direct financing leases, leveraged leases, and sales-type leases.
- Other (including Mission Related) additional
  investments in rural America approved by the FCA on a
  program or a case-by-case basis. Examples of such
  investments include partnerships with agricultural and rural
  community lenders, investments in rural economic
  development and infrastructure, and investments in
  obligations and mortgage securities that increase the
  availability of affordable housing in rural America.

A summary of loans outstanding at period end follows:

|                                  |               | De | cember 31, |               |
|----------------------------------|---------------|----|------------|---------------|
|                                  | 2017          |    | 2016       | 2015          |
| Real estate mortgage             | \$<br>185,083 | \$ | 186,121    | \$<br>179,403 |
| Production and intermediate-term | 68,978        |    | 69,267     | 77,637        |
| Loans to cooperatives            | 555           |    | 1,818      | 5             |
| Processing and marketing         | 9,307         |    | 10,944     | 12,985        |
| Farm-related business            | 3,305         |    | 4,088      | 1,851         |
| Communication                    | 1,485         |    | 1,152      | 1,228         |
| Power and water/waste disposal   | 1,487         |    | _          | -             |
| Rural residential real estate    | 3,966         |    | 3,040      | 2,755         |
| International                    | 946           |    | 945        | _             |
| Total loans                      | \$<br>275,112 | \$ | 277,375    | \$<br>275,864 |

A substantial portion of the Association's lending activities is collateralized and the Association's exposure to credit loss associated with lending activities is reduced accordingly.

The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but typically includes farmland and income-producing property, such as crops and livestock, as well as receivables. Long-term real estate loans are collateralized by the first liens on the underlying real property. Federal regulations state that long-term real estate loans are not to exceed 85 percent (97 percent if guaranteed by a government agency) of the property's appraised value. However, a decline in a property's market value subsequent to loan origination or advances, or other actions necessary to protect the financial interest of the Association in the collateral, may result in loan to value ratios in excess of the regulatory maximum.

The Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with FCA regulations. During 2016, the Association canceled its participation in the Capitalized Participation Pool program with the Bank. As a result, the Association repurchased \$2,676 of participations previously sold to AgFirst. The following tables present the principal balance of participation loans at periods ended:

|                                  |                           |      |                      |    |                             |     | Decembe               | r 31, | 2017                      |     |                      |                           |      |                      |

The recorded investment in a receivable is the face amount increased or decreased by applicable accrued interest and unamortized premium, discount, finance charges, or acquisition costs, and may also reflect a previous direct write-down of the investment.

The following table shows loans and related accrued interest classified under the FCA Uniform Loan Classification System as a percentage of total loans and related accrued interest receivable by loan type as of:

| _                                 | 1        | December 31, |                 |                                 | 1        | December 31, |          |

<sup>\*</sup>Includes the loan types: Loans to cooperatives, Processing and marketing, and Farm-related business.

To mitigate risk of loan losses, the Association may enter into guarantee arrangements with certain GSEs, including the Federal Agricultural Mortgage Corporation (Farmer Mac), and state or federal agencies. These guarantees generally remain in place until the loans are paid in full or expire and give the Association the right to be reimbursed for losses incurred or to sell designated loans to the guarantor in the event of default (typically four months past due), subject to certain conditions. The guaranteed balance of designated loans under these agreements was \$6,305, \$6,496, and \$8,396 at December 31, 2017, 2016, and 2015, respectively. Fees paid for such guarantee commitments totaled \$1, \$2, and \$2 for 2017, 2016, and 2015, respectively. These amounts are classified as noninterest expense.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented. There were no new TDRs for the years ended December 31, 2017 and December 31, 2015; therefore no tables are presented for those periods.

| Year Ended December 31, 2016 |   |      |  |                                    |  |                              |  |  |   |  |  |  |

| \$                           | - | \$   | 100  | \$                                 | _  | \$                           | 100  | \$   | =   |  |  |  |
|                              |   | \$ - | Concessions   Cor<br>  \$   - \$<br>  \$   - \$<br>  \$   - \$ | Interest   Principal   Concessions | Interest   Principal   O   Concessions     \$ - \$   130   \$     \$ - \$   130   \$     \$ - \$   130   \$     \$ - \$   100   \$ | Interest   Principal   Other | Interest   Principal   Other   Concessions | Interest   Principal   Other   Concessions   Total | Interest   Principal   Other   Concessions   Total   Charge |  |  |  |

Interest concessions may include interest forgiveness and interest deferment. Principal concessions may include principal forgiveness, principal deferment, and maturity extension. Other concessions may include additional compensation received which might be in the form of cash or other assets.

There were no TDRs that occurred during the previous twelve months and for which there was a subsequent payment default during the periods presented. Payment default is defined as a payment that was thirty days or more past due.

The following table provides information at each period end on outstanding loans restructured in troubled debt restructurings. These loans are included as impaired loans in the impaired loan table.

Real estate mortgage
Production and intermediate-term
Rural residential real estate
Total loans
Additional commitments to lend

For the year ended December 31, 2017, there were no foreclosed residential real estate properties held as a result of obtaining physical possession. For the year ended December 31, 2017, there were also no recorded investments in consumer mortgage loans secured by residential real estate for which formal foreclosure proceedings were in progress.

#### Note 4 — Investments

#### Investments in Other Farm Credit Institutions

Investments in other Farm Credit System Institutions are generally nonmarketable investments consisting of stock and participation certificates, allocated surplus, and reciprocal investments in other institutions regulated by the FCA. The Association is required to maintain ownership in the Bank in the form of Class B or Class C stock as required by the Bank. The Bank may require additional capital contributions to maintain its capital requirements. Accounting for this investment is on the cost plus allocated equities basis.

The Association's investment in the Bank totaled \$2,733 for 2017, \$2,697 for 2016 and \$3,052 for 2015. The Association owns 1.02 percent of the issued stock of the Bank as of December 31, 2017 net of any reciprocal investment. As of that date, the Bank's assets totaled \$32.5 billion and shareholders' equity totaled \$2.2 billion. The Bank's earnings were \$345 million for 2017. In addition, the Association had an investment of \$644 related to other Farm Credit Institutions at December 31, 2017.

# Note 5 — Real Estate and Other Property

## Premises and Equipment

Premises and equipment consists of the following:

Land
Buildings and improvements
Furniture and equipment
Less: accumulated depreciation

December 31.

# Other Property Owned

Net (gains) losses on other property owned consist of the following:

|   |          | December 31, |      |    |       |  |  |  |
|---|----------|--------------|------|----|-------|--|--|--|
|   | 2017     |              | 2016 |    | 2015  |  |  |  |
| (Gains) losses on sale, net                 | \$<br>8  | \$           | (11) | \$ | (215) |  |  |  |
| Carrying value unrealized (gains) losses    | _        |              | 5    |    | 189   |  |  |  |
| Operating (income) expense, net             | 53       |              | 27   |    | 53    |  |  |  |
| (Gains) losses on other property owned, net | \$<br>61 | \$           | 21   | \$ | 27    |  |  |  |

Gains on sales of other property owned were deferred if the sales involved financing from the Association and did not meet the criteria for immediate recognition. Deferred gains totaled \$54, \$58, and \$61 at December 31, 2017, 2016, and 2015, respectively.

## Note 6 — Debt

## Notes Payable to AgFirst Farm Credit Bank

Under the Farm Credit Act, the Association is obligated to borrow only from the Bank, unless the Bank approves borrowing from other funding sources. The borrowing relationship is established with the Bank through a General Financing Agreement (GFA). The GFA utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The GFA has a one year term which expires on December 31 and is renewable each year. The Association has no reason to believe the GFA will not be renewed upon expiration. The Bank, consistent with FCA regulations, has established limitations on the Association's ability to borrow funds based on specified factors or formulas relating primarily to credit quality and financial condition. At December 31, 2017, the Association's notes payable were within the specified limitations.

The Association's indebtedness to the Bank represents borrowings by the Association to fund its earning assets. This indebtedness is collateralized by a pledge of substantially all of the Association's assets and the terms of the revolving lines of credit are governed by the GFA. Interest rates on both variable and fixed rate advances are generally established loan-by-loan, based on the Bank's marginal cost of funds, capital position, operating costs and return objectives. In the event of prepayment of any portion of a fixed rate advance, the Association may incur a prepayment penalty in accordance with the terms of the GFA, which will be included in interest expense. The interest rate is periodically adjusted by the Bank based upon agreement between the Bank and the Association.

The weighted average interest rates on the variable rate advances were 2.54 percent for LIBOR-based loans and 2.70 percent for Prime-based loans, and the weighted average remaining maturities were 4.2 years and 6.2 years, respectively, at December 31, 2017. The weighted-average interest rate on the fixed rate and adjustable rate mortgage (ARM) loans which are match funded by the Bank was 2.83 percent, and the weighted average remaining maturity was 8.1 years at December 31, 2017. The weighted-average interest rate on all interest-bearing notes payable was 2.78 percent and the weighted-average remaining maturity was 7.4 years at December 31, 2017. Variable rate and fixed rate notes payable represent approximately -5.33 percent and 105.33 percent, respectively, of total notes payable at December 31, 2017. The variable rate percentage was negative due to variable rate credits that exceeded variable rate borrowings. Even though loans to borrowers are match funded by the notes payable to the Bank, they are not funded dollar for dollar. Association capital levels effectively create a borrowing margin between the amount of loans outstanding and the amount of notes payable outstanding. This margin is commonly referred to as "Loanable Funds" and is recorded on the Association's general ledger as a debit, offsetting the notes payable to the Bank. At December 31, 2017, this resulted in a net variable rate notes payable debit and caused the -5.33 percent.

The weighted average maturities described above are related to matched-funded loans. The direct note itself has an annual maturity as prescribed in the GFA.

# Note 7 — Members' Equity

A description of the Association's capitalization requirements, protection mechanisms, regulatory capitalization requirements and restrictions, and equities are provided below:

- A. Protected Borrower Stock: Protection of certain borrower stock is provided under the Farm Credit Act, which requires the Association, when retiring protected borrower stock, to retire such stock at par or stated value regardless of its book value. Protected borrower stock includes capital stock and participation certificates, which were outstanding as of January 6, 1988, or were issued or allocated prior to October 6, 1988. If an Association is unable to retire protected borrower stock at par value or stated value, amounts required to retire this equity would be obtained from the Insurance Fund.
- B. Capital Stock and Participation Certificates: In accordance with the Farm Credit Act and the Association's Bylaws, each borrower is required to invest in Class C stock for agricultural loans, or participation certificates in the case of rural home and farm-related business loans, as a condition of borrowing. The initial borrower investment,

through either purchase or transfer, must be in an amount equal to the lesser of \$1 thousand or two percent of the amount of the loan. The Board of Directors may increase the amount of investment if necessary to meet the Association's capital needs. Loans designated for sale or sold into the secondary market on or after April 16, 1996 will have no voting stock or participation certificate purchase requirement if sold within 180 days following the date of designation.

The borrower acquires ownership of the capital stock or participation certificates at the time the loan is made, but usually does not make a cash investment. The aggregate par value is generally added to the principal amount of the related loan obligation. The Association retains a first lien on the stock or participation certificates owned by borrowers. Retirement of such equities will generally be at the lower of par or book value, and repayment of a loan does not automatically result in retirement of the corresponding stock or participation certificates.

C. Regulatory Capitalization Requirements and Restrictions: An FCA regulation empowers it to direct a transfer of funds or equities by one or more System institutions to another System institution under specified circumstances. The Association has not been called upon to initiate any transfers and is not aware of any proposed action under this regulation.

There are currently no prohibitions in place that would prevent the Association from retiring stock, distributing earnings, or paying dividends per the statutory and regulatory restrictions, and the Association has no reason to believe any such restrictions may apply in the future.

Effective January 1, 2017, the regulatory capital requirements for System Banks and associations were modified. The new regulations ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted. New regulations replaced core surplus and total surplus ratios with common equity tier 1 (CET1) capital, tier 1 capital, and total capital risk-based capital ratios. The new regulations also include a tier 1 leverage ratio and an unallocated retained earnings equivalents (UREE) leverage ratio. The permanent capital ratio (PCR) remains in effect.

The ratios are calculated using three-month average daily balances, in accordance with FCA regulations, as follows:

- The CET1 capital ratio is the sum of statutory minimum purchased borrower stock, other required borrower stock held for a minimum of 7 years, allocated equities held for a minimum of 7 years or not subject to revolvement, unallocated retained earnings, paid-in capital, less certain regulatory required deductions including the amount of investments in other System institutions, divided by average risk-adjusted assets.
- The tier 1 capital ratio is CET1 capital plus noncumulative perpetual preferred stock, divided by average risk-adjusted assets.
- The total capital ratio is tier 1 capital plus other required borrower stock held for a minimum of 5 years, subordinated debt and limited-life preferred stock greater

- than 5 years to maturity at issuance subject to certain limitations, allowance for loan losses and reserve for unfunded commitments under certain limitations less certain investments in other System institutions under the corresponding deduction approach, divided by average risk-adjusted assets.
- The permanent capital ratio is all at-risk borrower stock, any allocated excess stock, unallocated retained earnings, paid-in capital, subordinated debt and preferred stock subject to certain limitations, less certain investments in
- other System institutions, divided by PCR risk-adjusted assets.
- The tier 1 leverage ratio is tier 1 capital, divided by average assets less regulatory deductions to tier 1 capital.
- The UREE leverage ratio is unallocated retained earnings, paid-in capital, and allocated surplus not subject to revolvement less certain regulatory required deductions including the amount of allocated investments in other System institutions divided by average assets less regulatory deductions to tier 1 capital.

The following sets forth the regulatory capital ratios which were effective January 1, 2017 and the Association's capital ratios as of December 31, 2017:

| Ratio                   | Minimum<br>Requirement | Capital<br>Conservation<br>Buffer* | Minimum Requirement<br>with Capital<br>Conservation Buffer | Association<br>Capital Ratios as of<br>December 31, 2017 |
|-------------------------|------------------------|------------------------------------|--|--|
| Risk-adjusted ratios:   |                        |                                    |  |  |
| CET1 Capital Ratio      | 4.5%                   | 0.625%                             | 5.125%   | 27.91%   |
| Tier 1 Capital Ratio    | 6.0%                   | 0.625%                             | 6.625%   | 27.91%   |
| Total Capital Ratio     | 8.0%                   | 0.625%                             | 8.625%   | 29.16%   |
| Permanent Capital Ratio | 7.0%                   | 0.0%                               | 7.0%   | 28.26%   |
| Non-risk-adjusted:      |                        |                                    |  |  |
| Tier 1 Leverage Ratio   | 4.0%                   | 1.0%                               | 5.0%   | 28.81%   |
| UREE Leverage Ratio     | 1.5%                   | 0.0%                               | 1.5%   | 25.32%   |

<sup>\*</sup> The capital conservation buffers have a 3 year phase-in period and will become fully effective January 1, 2020. Riskadjusted ratio minimums will increase 0.625% each year until fully phased in. There is no phase-in period for the tier 1 leverage ratio.

If the capital ratios fall below the minimum regulatory requirements, including the buffer amounts, capital distributions (equity redemptions, dividends, and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

D. **Description of Equities:** The Association is authorized to issue or have outstanding Classes A and D Preferred Stock, Classes A, B, and C Common Stock, Classes B and C Participation Certificates and such other classes of equity as may be provided for in amendments to the Bylaws in such amounts as may be necessary to conduct the Association's business. All stock and participation certificates have a par or face value of five dollars (\$5.00) per share.

The Association had the following shares outstanding at December 31, 2017:

|  |           | Shares Ou | ıtstanding             |
|--|-----------|-----------|------------------------|
| Class                                  | Protected | Number    | Aggregate<br>Par Value |
| C Common/Voting                        | No        | 175,777   | \$ 879                 |
| C Participation Certificates/Nonvoting | No        | 14,411    | 72                     |
| Total Capital Stock                    |           |           |                        |
| and Participation Certificates         |           | 190,188   | \$ 951                 |
| 1                                      |           | 190,188   | \$ 951                 |

Protected common stock and participation certificates are retired at par or face value in the normal course of business. At-risk common stock and participation certificates are retired at the sole discretion of the Board at book value not to exceed par or face amounts, provided the minimum capital adequacy standards established by the Board are met.

#### Retained Earnings

The Association maintains an unallocated retained earnings account and an allocated retained earnings account. The minimum aggregate amount of these two accounts is determined by the Board. At the end of any fiscal year, if the retained earnings accounts otherwise would be less than the minimum amount determined by the Board as necessary to maintain adequate capital reserves to meet the commitments of the Association, the Association shall apply earnings for the year to the unallocated retained earnings account in such amounts as may be determined necessary by the Board. Unallocated retained earnings are maintained for each borrower to permit liquidation on a patronage basis.

The Association maintains an allocated retained earnings account consisting of earnings held and allocated to borrowers on a patronage basis. In the event of a net loss for any fiscal year, such allocated retained earnings account will be subject to full impairment in the order specified in the Bylaws beginning with the most recent allocation.

The Association has a first lien and security interest on all retained earnings account allocations owned by any borrowers, and all distributions thereof, as additional collateral for their indebtedness to the Association. When the debt of a borrower is in default or is in the process of final liquidation by payment or otherwise, the Association, upon approval of the Board, may order any and all retained earnings account allocations owned by such borrower to be applied on the indebtedness.

Allocated equities shall be retired solely at the discretion of the Board; provided, however, that minimum capital standards established by the FCA and the Board are met.

At December 31, 2017, allocated members' equity consisted of \$7,522 of nonqualified allocated surplus and \$36,420 of nonqualified retained surplus.

#### Dividends

The Association may declare noncumulative dividends on its capital stock and participation certificates provided the dividend rate does not exceed 20 percent of the par value of the respective capital stock and participation certificates. Such dividends may be paid solely on Classes A or D Preferred Stock or on all classes of stock and participation certificates.

The rate of dividends paid on Class A Preferred Stock for any fiscal year may not be less than the rate of dividend paid on Classes A, B, or C Common Stock or participation certificates for such year. The rate of dividends on Classes A, B, or C Common Stock and participation certificates shall be at the same rate per share.

Dividends may not be declared if, after recording the liability, the Association would not meet its capital adequacy standards. No dividends were declared by the Association for any of the periods included in these Consolidated Financial Statements.

#### Patronage Distributions

Prior to the beginning of any fiscal year, the Board, by adoption of a resolution, may obligate the Association to distribute to borrowers on a patronage basis all or any portion of available net earnings for such fiscal year or for that and subsequent fiscal years. Patronage distributions are based on the proportion of the borrower's interest to the amount of interest earned by the Association on its total loans unless another proportionate patronage basis is approved by the Board.

If the Association meets its capital adequacy standards after making the patronage distributions, the patronage distributions may be in cash, authorized stock of the Association, allocations of earnings retained in an allocated members' equity account, or any one or more of such forms of distribution. Patronage distributions of the Association's earnings may be paid on either a qualified or nonqualified basis, or a combination of both, as determined by the Board. A minimum of 20 percent of the total qualified patronage distribution to any borrower for any fiscal year shall always be paid in cash.

# Transfer

Classes A and D Preferred Stocks, Classes A, B, and C Common Stocks, and Classes B and C Participation Certificates may be transferred to persons or entities eligible to purchase or hold such equities.

## Impairment

Any net losses recorded by the Association shall first be applied against unallocated members' equity. To the extent that such losses would exceed unallocated members' equity, such losses would be applied consistent with the Association's Bylaws and distributed pro rata to each share and/or unit outstanding in the class, in the following order:

- Class C Common Stock and Class C Participation Certificates
- Classes A and B Common Stock and Class B Participation Certificates
- 3. Classes A and D Preferred Stock

## Liquidation

In the event of liquidation or dissolution of the Association, any assets of the Association remaining after payment or retirement of all liabilities should be distributed to the holders of the outstanding stock and participation certificates in the following order:

- 1. Classes A and D Preferred Stock
- 2. Classes A, B and C Common Stock, and Classes B and C Participation Certificates
- 3. Holders of allocated surplus evidenced by qualified written notices of allocation
- 4. Holders of allocated surplus evidenced by nonqualified written notices of allocation
- All unallocated surplus issued after January 1, 1995, shall be distributed to past and present Patrons on a patronage basis
- Any remaining assets of the Association after such distribution shall be distributed ratably to the holders of all classes of stock and participation certificates

## Note 8 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

Estimating the fair value of the Association's investment in the Bank and Other Farm Credit Institutions is not practicable because the stock is not traded. The net investment is a requirement of borrowing from the Bank and is carried at cost plus allocated equities.

The classifications within the fair value hierarchy (See Note 2) are as follows:

# Level 1

Assets held in trust funds related to deferred compensation plans are classified as Level 1. For cash, the carrying value is primarily utilized as a reasonable estimate of fair value.

#### Level 2

The Association had no Level 2 assets or liabilities measured at fair value on a recurring basis.

#### Level 3

Because no active market exists for the Association's accruing loans, fair value is estimated by discounting the expected future cash flows using the Association's current interest rates at which similar loans currently would be made to borrowers with similar credit risk. The loan portfolio is segregated into pools of loans with homogeneous characteristics based upon repricing and credit risk. Expected future cash flows and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

Fair values of loans in a nonaccrual status are estimated to be the carrying amount of the loan less specific reserves. Certain loans evaluated for impairment under FASB guidance have fair values based upon the underlying collateral, as the loans were collateral-dependent. Specific reserves were established for these loans when the value of the collateral, less estimated cost to sell, was less than the principal balance of the loan. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters.

Notes payable are segregated into pricing pools according to the types and terms of the loans (or other assets) which they fund. Fair value of the notes payable is estimated by discounting the anticipated cash flows of each pricing pool using the current rate that would be charged for additional borrowings. For purposes of this estimate it is assumed the cash flow on the notes is equal to the principal payments on the Association's loan receivables. This assumption implies that earnings on the Association's interest margin are used to fund operating expenses and capital expenditures.

Other property owned is classified as a Level 3 asset. The fair value is generally determined using formal appraisals of each individual property. These assets are held for sale. Costs to sell represent transaction costs and are not included as a component of the fair value of other property owned. Other property owned consists of real and personal property acquired through foreclosure or deed in lieu of foreclosure and is carried as an asset held for sale, which is generally not its highest and best use. These properties are part of the Association's credit risk mitigation efforts, not its ongoing business. In addition, FCA regulations require that these types of property be disposed of within a reasonable period of time.

For commitments to extend credit, the estimated market value of off-balance-sheet commitments is minimal since the committed rate approximates current rates offered for commitments with similar rate and maturity characteristics; therefore, the related credit risk is not significant.

There were no Level 3 assets and liabilities measured at fair value on a recurring basis for the periods presented. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the periods presented.

Fair values are estimated at each period end date for assets and liabilities measured at fair value on a recurring basis. Other Financial Instruments are not measured at fair value in the statement of financial position, but their fair values are estimated as of each period end date. The following tables summarize the carrying amounts of these assets and liabilities at period end, and their related fair values.

|   | December 31, 2017 |                             |    |         |    |         |    |         |    |                     |  |

# SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted

impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

## Inputs to Valuation Techniques

Management determines the Association's valuation policies and procedures. The Bank performs the majority of the Association's valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

Quoted market prices are generally not available for the instruments presented below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics

of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

| Quantitative Information about Recurring | g and Nonrecurring | g Level 3 Fair Value Measurements |
|--|--------------------|-----------------------------------|
|--|--------------------|-----------------------------------|

|   | Fai | ir Value | Valuation Technique(s) | Unobservable Input        | Range |
|---|-----|----------|------------------------|---------------------------|-------|
| Impaired loans and other property owned | \$  | 5,301    | Appraisal              | Income and expense        | *     |
|   |     |          |                        | Comparable sales          | *     |
|   |     |          |                        | Replacement costs         | *     |
|   |     |          |                        | Comparability adjustments | *     |

<sup>\*</sup> Ranges for this type of input are not useful because each collateral property is unique.

#### Information about Other Financial Instrument Fair Value Measurements

|   | Valuation Technique(s) | Input  |
|---|------------------------|--|
| Cash                                      | Carrying Value         | Par/Principal and appropriate interest yield |
| Loans                                     | Discounted cash flow   | Prepayment forecasts                         |

|   |                        | Loss severity                                |

# Note 9 — Employee Benefit Plans

The Association participates in three District sponsored benefit plans. These plans include a multi-employer defined benefit pension plan, the AgFirst Farm Credit Retirement Plan, which is a final average pay plan (FAP Plan). In addition, the Association participates in a multi-employer defined benefit other postretirement benefits plan (OPEB Plan), the Farm Credit Benefits Alliance Retiree and Disabled Medical and Dental Plan, and a defined contribution 401(k) plan. The risks of participating in these multi-employer plans are different from single-employer plans in the following aspects:

- Assets contributed to multi-employer plans by one employer may be used to provide benefits to employees of other participating employers.
- 2. If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.
- 3. If the Association chooses to stop participating in some of its multi-employer plans, the Association may be required to contribute to eliminate the underfunded status of the plan.

The Association previously participated in a separate multiemployer plan, the AgFirst Farm Credit Cash Balance Retirement Plan which is a cash balance plan (CB Plan). In November 2014, the AgFirst Plan Sponsor Committee approved and executed amendments to the CB Plan that included the following changes:

- The CB Plan was closed to new participants effective as of December 31, 2014. Based on the plan's eligibility provisions, this change affected employees hired on or after November 4, 2014.
- 2. Employer contributions were discontinued effective as of January 1, 2015.
- All participants who were not already fully vested in the CB Plan became fully vested as of December 31, 2014.

 The CB Plan was terminated effective as of December 31, 2015.

Curtailment accounting, as prescribed in ASC 715 "Compensation – Retirement Benefits", was initiated upon execution of the plan amendments and did not have a material impact on the Association's financial condition or results of operations.

A favorable determination letter was received from the Internal Revenue Service, and as a result of the termination of the CB Plan, vested benefits were distributed to participants in 2017

Beginning on January 1, 2015, for participants in the CB Plan and eligible employees hired on or after November 4, 2014, additional employer contributions are made to the 401(k) Plan equal to 3.00 percent of the participants' eligible compensation.

The District's multiemployer plans are not subject to ERISA and no Form 5500 is required. As such, the following information is neither available for nor applicable to the plans:

- 1. The Employee Identification Number (EIN) and three-digit Pension Plan Number
- The most recent Pension Protection Act (PPA) zone status. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the yellow zone are less than 80 percent funded, and plans in the green zone are at least 80 percent funded.
- 3. The "FIP/RP Status" indicating whether a financial improvement plan (FIP) or a rehabilitation plan (RP) is either pending or has been implemented.
- 4. The expiration date(s) of collective-bargaining agreement(s).

During 2017, the method of recording expenses at participating District entities for the FAP and OPEB Plans was modified. Prior to 2017, expense was recorded based on allocations of actuarially-determined costs and any differences between

recorded expense and actual contributions were recorded in Other Assets or Other Liabilities on the Consolidated Balance Sheets. For 2017 and future years, participating entities will record employee benefit costs based on the actual contributions to the Plans. This change caused the Association to modify its accounting estimates recorded in Other Assets and Other Liabilities since the assets and liabilities do not impact future contributions to the Plans. The change in estimate resulted in the reduction of Other Assets by \$629 and the reduction of Other Liabilities by \$1,401 on the Association's Balance Sheets, and a total reduction of employee benefit costs on the Association's Statements of Income of \$772 during 2017.

The FAP Plan includes other District employees that are not employees of the Association and is accounted for as a multiemployer plan. The related net benefit plan obligations are not included in the Association's Balance Sheets but are included in the Combined Balance Sheets for the AgFirst District. FAP Plan expenses included in employee benefit costs on the Association's Statements of Income were \$279 for 2017, \$569 for 2016, and \$601 for 2015. At December 31, 2017, 2016, and 2015, the total liability balance for the FAP Plan presented in the District Combined Balance Sheets is \$139,104, \$119,000, and \$123,902, respectively. The FAP Plan is 86.41 percent, 86.96 percent, and 85.73 percent funded to the projected benefit obligation as of December 31, 2017, 2016, and 2015, respectively.

In addition to providing pension benefits, the Association provides certain medical and dental benefits for eligible retired employees through the OPEB Plan. Substantially all of the Association employees may become eligible for the benefits if they reach early retirement age while working for the Association. Early retirement age is defined as a minimum of age 55 and 10 years of service. Employees hired after December 31, 2002, and employees who separate from service between age 50 and age 55, are required to pay the full cost of their retiree health insurance coverage. Employees who retire subsequent to December 1, 2007 are no longer provided retiree life insurance benefits. The OPEB Plan includes other Farm Credit System employees that are not employees of the Association or District and is accounted for as a multiemployer plan. The related net benefit plan obligations are not included in the Association's Balance Sheets but are included in the Combined Statement of Condition for the Farm Credit System. The OPEB Plan is unfunded with expenses paid as incurred. Postretirement benefits other than pensions included in employee benefit costs on the Association's Statements of Income were \$98 for 2017, \$151 for 2016, and \$194 for 2015. At December 31, 2017, the total AgFirst District liability balance for the OPEB Plan presented in the Farm Credit System Combined Statement of Condition is \$216,259.

The Association also participates in a defined contribution Farm Credit Benefits Alliance (FCBA) 401(k) Plan (401(k) Plan), which qualifies as a 401(k) plan as defined by the Internal Revenue Code. For employees hired on or prior to December 31, 2002, the Association contributes \$0.50 for each \$1.00 of the employee's first 6.00 percent of contribution (based on total compensation) up to the maximum employer contribution of 3.00 percent of total compensation. For employees hired on or after January 1, 2003, the Association contributes \$1.00 for each \$1.00 of the employee's first 6.00 percent of contribution up to the maximum employer contribution of 6.00 percent of total compensation. Employee deferrals are not to exceed the maximum deferral as determined and adjusted by the Internal

Revenue Service. The 401(k) Plan costs are expensed as funded. Employer contributions to this plan included in salaries and employee benefit costs were \$220, \$206, and \$194 for the years ended December 31, 2017, 2016, and 2015, respectively. Beginning in 2015, contributions include additional amounts related to the discontinuation of the CB Plan as discussed above.

In addition to the multi-employer plans described above, the Association sponsors a nonqualified supplemental 401(k) plan. Expenses of this nonqualified plan included in employee benefits costs were \$1, \$0, and \$0 for 2017, 2016, and 2015, respectively.

Additional information for the above may be found in Note 9 in the Notes to the Combined Financial Statements of AgFirst Farm Credit Bank and District Associations' Annual Report and the Notes to the Annual Information Statement of the Farm Credit System.

## Note 10 — Related Party Transactions

In the ordinary course of business, the Association enters into loan transactions with officers and directors of the Association, their immediate families and other organizations with which such persons may be associated. Such loans are subject to special approval requirements contained in the FCA regulations and are made on the same terms, including interest rates, amortization schedule, and collateral, as those prevailing at the time for comparable transactions with unaffiliated borrowers.

Total loans to such persons at December 31, 2017 amounted to \$6,306. During 2017, \$4,858 of new loans and advances were made and repayments totaled \$4,263. In the opinion of management, none of these loans outstanding at December 31, 2017 involved more than a normal risk of collectability.

## Note 11 — Commitments and Contingencies

From time to time, legal actions are pending against the Association in which claims for money damages are asserted. On at least a quarterly basis, the Association assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management, after consultation with legal counsel, is of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Association. Because it is not probable that the Association will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

In the normal course of business, the Association may participate in financial instruments with off-balance-sheet risk to satisfy the financing needs of its borrowers. These financial instruments may include commitments to extend credit or letters of credit

The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the financial statements. Commitments to extend credit are agreements to lend to a borrower as long as there is not a violation of any condition established in the contract. Commercial letters of credit are agreements to pay a beneficiary under conditions specified in the letter of credit. Commitments and letters of

credit generally have fixed expiration dates or other termination clauses and may require payment of a fee.

Since many of these commitments are expected to expire without being drawn upon, the total commitments do not necessarily represent future cash requirements. However, these credit-related financial instruments have off-balance-sheet credit risk because their amounts are not reflected on the Consolidated Balance Sheets until funded or drawn upon. The credit risk associated with issuing commitments and letters of credit is substantially the same as that involved in extending loans to borrowers and management applies the same credit policies to these commitments. Upon fully funding a commitment, the credit risk amounts are equal to the contract amounts, assuming that borrowers fail completely to meet their obligations and the collateral or other security is of no value. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the borrower. At December 31, 2017, \$29,842 of commitments to extend credit and no commercial letters of credit were outstanding with a related reserve for unfunded commitments of \$40 which is included in Other Liabilities in the Consolidated Balance Sheets.

The Association also participates in standby letters of credit to satisfy the financing needs of its borrowers. These letters of credit are irrevocable agreements to guarantee payments of specified financial obligations. At December 31, 2017, standby letters of credit outstanding totaled \$220 with expiration dates ranging from January 1, 2018 to April 15, 2020. The maximum potential amount of future payments that may be required under these guarantees was \$220.

#### Note 12 — Income Taxes

The provision (benefit) for income taxes follows:

|  | Year Ended December 31, |     |    |     |    |     |
|--|-------------------------|-----|----|-----|----|-----|
|  | 2                       | 017 | 2  | 016 | 2  | 015 |
| Current:                                   |                         |     |    |     |    |     |
| Federal                                    | \$                      | _   | \$ | _   | \$ | _   |
| State                                      |                         | _   |    | -   |    | _   |
|  |                         | _   |    | _   |    |     |
| Deferred:                                  |                         |     |    |     |    |     |
| Federal                                    |                         | _   |    | _   |    | _   |
| State                                      |                         | _   |    | _   |    | _   |
|  |                         | _   |    |     |    |     |
| Total provision (benefit) for income taxes | \$                      | _   | \$ | -   | \$ | _   |

The provision (benefit) for income tax differs from the amount of income tax determined by applying the applicable U.S. statutory federal income tax rate to pretax income as follows:

| <u> </u>                             | December 31, |          |          |  |  |
|--------------------------------------|--------------|----------|----------|--|--|
|                                      | 2017         | 2016     | 2015     |  |  |
| Federal tax at statutory rate        | 3 2,814      | \$ 2,302 | \$ 2,380 |  |  |
| State tax, net                       | _            | _        | _        |  |  |
| Patronage distributions              | (1,400)      | (1,050)  | (1,050)  |  |  |
| Tax-exempt FLCA earnings             | (715)        | (1,178)  | (606)    |  |  |
| Change in valuation allowance        | (1,214)      | (81)     | (681)    |  |  |
| Deferred tax rate change             | 552          |          |          |  |  |
| Other                                | (37)         | 7        | (43)     |  |  |
| Provision (benefit) for income taxes | -            | \$ -     | \$ -     |  |  |

In late December 2017, federal tax legislation was enacted which, among other things, lowered the federal corporate tax rate from 35% to 21% beginning on January 1, 2018. The change to the lower corporate tax rate led to an insignificant remeasurement of the deferred tax liabilities and deferred tax assets in 2017, the period of enactment. Deferred tax assets and liabilities are comprised of the following at:

|        | December .        | J1,   |
|--------|-------------------|---|
| 2017   | 7 2016            | 2015  |
|        |                   |   |
| \$ 295 | \$ 774            | \$ 815  |
| 721    | 1,305             | 1,041   |
| -      |                   | _   |
| 67     | 182               | 440   |
|        |                   |   |
|        | - 32              | 63  |
| 1,083  | 2,293             | 2,359   |
| (1,057 | (2,270)           | (2,351)   |
|        |                   |   |
| 26     | 5 23              | 8   |
| (26    | (23)              | (8)   |
|        |                   | -   |
| \$ -   | - \$ -            | \$ -  |
|        | \$ 295<br>721<br> | 2017         2016           \$ 295         \$ 774           721         1,305           -         -           67         182           -         32           1,083         2,293           (1,057)         (2,270)           26         23           (26)         (23)           -         - |

December 31.

At December 31, 2017, deferred income taxes have not been provided by the Association on approximately \$56 of patronage refunds received from the Bank prior to January 1, 1993. Such refunds, distributed in the form of stock, are subject to tax only upon conversion to cash. The tax liability related to future conversions is not expected to be material.

The Association recorded a valuation allowance of \$1,057, \$2,270 and \$2,351 as of December 31, 2017, 2016 and 2015, respectively. The Association will continue to evaluate the realizability of these deferred tax assets and adjust the valuation allowance accordingly.

There were no uncertain tax positions identified related to the current year and the Association has no unrecognized tax benefits at December 31, 2017 for which liabilities have been established. The Association recognizes interest and penalties, if any, related to unrecognized tax benefits as a component of income tax expense.

The tax years that remain open for federal and major state income tax jurisdictions are 2014 and forward.

# Note 14 — Subsequent Events

The Association evaluated subsequent events and determined that there were none requiring disclosure through March 13, 2018, which was the date the financial statements were issued.
